Indigenous Studies and Engaged Anthropology Paul Sillitoe,2016-05-23 Advancing the rising field of engaged or participatory anthropology that is emerging at the same time as increased opposition from Indigenous peoples to research this book offers critical reflections on research approaches to date The engaged approach seeks to change the researcher researched relationship fundamentally to make

methods more appropriate and beneficial to communities by involving them as participants in the entire process from choice of research topic onwards. The aim is not only to change power relationships but also engage with non academic audiences. The advancement of such an egalitarian and inclusive approach to research can provoke strong opposition. Some argue that it threatens academic rigour and worry about the undermining of disciplinary authority. Others point to the difficulties of establishing an appropriately non ethnocentric moral stance and navigating the complex problems communities face. Drawing on the experiences of Indigenous scholars, anthropologists and development professionals acquainted with a range of cultures, this book furthers our understanding of pressing issues such as interpretation, transmission and ownership of Indigenous knowledge and appropriate ways to represent and communicate it. All the contributors recognise the plurality of knowledge and incorporate perspectives that derive at least in part from other ways of being in the world.
