Trianni,2021-02-26 Industrial energy efficiency has been recognized as a major contributor in the broader set of industrial
resources to improved sustainability and circular economy Nevertheless the uptake of energy efficiency measures and
practices is still quite low due to the existence of several barriers Research has broadly discussed them together with their
drivers More recently many researchers have highlighted the existence of several benefits beyond mere energy savings
stemming from the adoption of such measures for several stakeholders involved in the value chain of energy efficiency
solutions Nevertheless a deep understanding of the relationships between the use of the energy resource and other resources
in industry together with the most important factors for the uptake of such measures also in light of the implications on the
industrial operations is still lacking However such understanding could further stimulate the adoption of solutions for
improved industrial energy efficiency and sustainability **Industrial Fabric Products Review** ,2002 *Chemical*
