Research Institute for Comparative Literature, 1998 *Canadian Books in Print. Author and Title Index*, 1975 *Human Capital Investment* Harriet Duleep, Mark C. Regets, Seth Sanders, Phanindra V. Wunnavu, 2021-02-10 In 1965 a family reunification policy for admitting immigrants to the United States replaced a system that chose immigrants based on their national origin With this change a 40 year hiatus in Asian immigration ended Today over three quarters of US immigrants originate from Asia and Latin America Two issues that dominate discussions of US immigration policy are the progress of post reform immigrants and their contributions to the US economy This book focuses on the earnings and human capital investment of Asian immigrants to the US after 1965 In addition it provides a primer on studying immigrant economic assimilation by explaining economists methodology to measure immigrant earnings growth and the challenges with this approach The book also illustrates strategies to more fully use census data such as how to measure family income and how to use panel data that is embedded in the census The book is a historical study as well as an extremely timely work from a policy angle The passage of the 1965 Immigration and Nationality Act set the United States apart among economically developed countries due to the weight given to family unification Based on analyses by economists

which suggest that the quality of immigrants to the US fell after the 1965 law policymakers have called for fundamental changes in the US system to align it with the immigration systems of other countries This book offers an alternative view point by proposing a richer model that incorporates investments in human capital by immigrants and their families It challenges the conventional model in three ways First it views the decline in immigrants entry earnings after 1965 as due to investment in human capital not to permanently lower quality Second it adds human capital investment and earnings growth after entry to the model And finally by taking investments by family members into account it challenges the policy recommendation that immigrants should be selected for their occupational qualifications rather than family connections

Labour Goes to War Wendy Cuthbertson, 2012 During the Second World War the Congress of Industrial Organizations in Canada grew from a handful of members to more than a quarter million and from political insignificance to a position of influence in the emergence of the welfare state What was it about the good war that brought about this phenomenal growth *Labour Goes to War* analyzes the organizing strategies of the CIO during the war to show that both cultural and economic forces were at work Labour shortages gave workers greater power in the workplace and increased their militancy But workers patriotism their ties to those on active service and allegiance to the people s war also contributed to the CIO s growth and to what it claimed for workers Drawing on a wealth of archival material Wendy Cuthbertson illuminates this complex wartime context She also shows how the complex often contradictory motives of workers during this period left the Canadian labour movement with an ambivalent progressive conservative legacy **Canadiana**, 1990

Alessandro Bonanno,Kae Sekine,Hart N. Feuer,2019-06-25 This book addresses the relevance of geographical indication GI as a tool for local and socio economic development and democratization of agri food with case studies from Asia Europe and the Americas A geographical indication is a sign used on products that have a specific geographical origin and possess qualities or a reputation that are due to that origin It provides not only a way for businesses to leverage the value of their geographically unique products but also to inform and attract consumers A highly contested topic GI is praised as a tool for the revitalization of agricultural communities while also criticized for being an instrument exploited by global corporate forces to promote their interests There are concerns that the promotion of GI may hamper the establishment of democratic forms of development The contributing authors address this topic by offering theoretically informed investigations of GI from around the world The book includes case studies ranging from green tea in Japan olive oil in Turkey and dried fish in Norway to French wine and Mexican Mezcal It also places GI in the broader context of the evolution and trends of agri food under neoliberal globalization The book will be of interest to researchers policy makers and students in agri food studies sociology of food and agriculture geography agricultural and rural economics environmental and intellectual property law and social development **Diplomacy Games** Rudolf Avenhaus,I. William Zartman,2007-05-11 In this book leading experts in

international negotiations present formal models of conflict resolution and international negotiations Besides the description of different models and approaches the book answers three questions How can the abstract concepts and results of rational choice theorists be made more understandable and plausible to political and social scientists not trained to work with formal models What can be done to encourage practitioners to use not only simple but also mathematically advanced approaches in their analysis of real world negotiation problems How can practitioners e g politicians and diplomats become interested in take into account and apply formal models of their more important problems Heroism and Global Politics Veronica

Kitchen,Jennifer G. Mathers,2018-10-12 The rhetoric of heroism pervades politics Political leaders invoke their own heroic

credentials soldiers are celebrated at sporting events ordinary citizens become state symbols or symbols of opposition and high profile celebrities embody a glamorized humanitarian heroism Using analytical tools drawn from international relations gender studies war studies history and comparative politics this book examines the cultural and political phenomenon of heroism and its relationship to the process of creating sustaining and challenging political communities Arguing that heroism is socially constructed and relational the contributors demonstrate that heroes and heroic narratives always serve particular interests in the ways that they create and uphold certain images of states and other political communities Studying the heroes that have been sanctioned by a community tells us important things about that community including how it sees itself its values and its pressing needs at a particular moment Conversely understanding those who are presented in opposition to heroes victims demonized opponents or who become the heroes of resistance movements can also tell us a great deal about the politics of a state or a regime Heroes are at once the institutionalization of political power and yet amorphous one can go from being a hero to a villain in short order This book will appeal to scholars and students working on topics related to international relations gender security and war studies comparative politics state building and political communities
