Artificial Organic Networks Hiram Ponce-Espinosa,Pedro Ponce-Cruz,Arturo Molina,2013-11-12 This monograph describes the synthesis and use of biologically inspired artificial hydrocarbon networks AHNs for approximation models associated with machine learning and a novel computational algorithm with which to exploit them The reader is first introduced to various kinds of algorithms designed to deal with approximation problems and then via some conventional ideas of organic chemistry to the creation and characterization of artificial organic networks and AHNs in particular The advantages of using organic networks are discussed with the rules to be followed to adapt the network to its objectives Graph theory is used as the basis of the necessary formalism Simulated and experimental examples of the use of fuzzy logic and genetic algorithms with organic neural networks are presented and a number of modeling problems suitable for treatment by AHNs are described approximation inference clustering control classification and audio signal filtering The text finishes with a consideration of directions in which AHNs could be implemented and developed in future A complete LabVIEWTM toolkit downloadable from the book s page at springer com enables readers to design and implement organic neural networks of their own The novel approach to creating networks suitable for machine learning systems demonstrated in Artificial Organic Networks will be of interest to academic researchers and graduate students working in areas associated with computational intelligence intelligent control systems approximation and complex networks [Modeling, Programming and Simulations Using LabVIEWTM Software](#) Riccardo de Asmundis,2011-01-21 Born originally as a software for instrumentation control LabVIEW became quickly a very powerful programming language having some peculiar characteristics which made it unique the simplicity in creating very effective Users Interfaces and the G programming mode While the former allows designing

very professional controls panels and whole Applications completed with features for distributing and installing them the latter represents an innovative and enthusiastic way of programming the Graphical representation of the code The surprising aspect is that such a way of conceiving algorithms is absolutely similar to the SADT method Structured Analysis and Design Technique introduced by Douglas T Ross and SofTech Inc USA in 1969 from an original idea of MIT and extensively used by US Air Force for their projects LabVIEW practically allows programming by implementing straightly the equivalent of an SADT actigram Beside this academical aspect LabVIEW can be used in a variety of forms creating projects that can spread over an enormous field of applications from control and monitor software to data treatment and archiving from modeling to instruments controls from real time programming to advanced analysis tools with very powerful mathematical algorithms ready to use from full integration with native hardware by National Instruments to an easy implementation of drivers for third party hardware In this book a collection of different applications which cover a wide range of possibilities is presented We go from simple or distributed control software to modeling done in LabVIEW from very specific applications to usage in the educational environment
