

ASSISTED PARKING BRAKE (continued)

Vehicles with an automatic gearbox

For safety reasons, automatic release is deactivated when the driver's door is open or not shut properly and the engine is running (in order to prevent the vehicle from moving without the driver). The "release manually" message appears on the instrument panel when the driver depresses the accelerator.

Operating faults

- If there is a fault, the  warning light illuminates on the instrument panel accompanied by the "Check parking brake" message and, in some cases, the  warning light.

Contact an approved Dealer as soon as possible.

- If there is an electronic parking brake fault, the  warning light illuminates accompanied by the "Parking brake fault" message, a beep and in some cases the  warning light.

This means that you must stop as soon as traffic conditions allow.

Never move your vehicle without moving the selector lever to position **P** or **R**. This is because when the vehicle is stationary with the engine running and a gear engaged, the vehicle may begin to move if you accelerate.

There is a risk of accidents.

If no lights or sounds are apparent, this indicates a fault in the instrument panel. This indicates that it is essential to stop immediately (as soon as traffic conditions allow). Ensure that the vehicle is correctly immobilised and contact an approved Dealer.

It is therefore essential to immobilise the vehicle by engaging first gear (manual gearbox) or position **P** (automatic gearbox). If the slope requires it, chock the vehicle.
