space.time.narrative Frank den Ouden,2016-12-05 Making exhibitions is a collaborative art producing is a multi layered unity of ideas and objects of invention and manifestation of content and form However there is an antagonistic dimension to it because content and form are traditionally represented by the entirely different realms of curator and designer Future successful developments in exhibition making are dependent on whether this gap of antagonism can be bridged space time narrative calls for a paradigmatic shift of focus It puts forward a unique approach breaking down traditional barriers and offering a wide ranging theoretical context redefining and expanding the parameters and the dynamics of the exhibition format in terms of an open narrative environment which at its roots displays deep similarities with performance on stage or installation in urban and rural space The book breaks new ground by looking at the exhibition as a cultural format firstly within a great sweep of the arts in general weaving a web of philosophical museological linguistic and media theoretical references which expands the contextual field of the profession It then offers unique and important insights from within in extreme close up by bringing together interviews with six of the leading exhibition designers who discuss the dynamics of the medium its interactive dimensions the soft parameters of the exhibition and how to get to grips with the format as a complex narrative space in which the public takes part Curator and designer should reposition themselves professionally at the heart of the axis which divides or connects content and form

Touch Caterina Nirta, Danilo Mandic, Andrea Pavoni, Andreas Philippopoulos-Mihalopoulos, 2020-01-17 Described by Aristotle as the most vital of senses touch contains both the physical and the metaphysical in its ability to express the determination of being To manifest itself touch makes a movement outwards beyond the body and relies on a specific physical involvement other senses do not require to touch is already to be active and to activate This fundamental ontology makes touch the most essential of all senses This volume of Law and the Senses attempts to illuminate and reconsider the complex and interflowing relations and contradictions between the tactful intrusion of the law and the untactful movement of touch Compelling

contributors from arts literature and social science disciplines alongside artist presentations explore touch's boundaries and formal and informal laws of the senses Each contribution unveils a multi-faceted new dimension to the force of touch its ability to form deform and reform what it touches In unique ways each of the several contributions to this volume recognises the trans-corporeality of touch to traverse the boundaries on the body and entangle other bodies and spaces thus challenging the very notion of corporeal integrity and human being

Galileo and 400 Years of Telescopic Astronomy Peter Grego, David Mannion, 2010-09-09 In 1609 Galileo first used his telescope to kick start the science of observational astronomy an event that proved to be of enormous historic scientific and cultural importance Galileo and 400 Years of Telescopic Astronomy will feature the life and achievements of Galileo around which has pivoted the story of four centuries of telescopic astronomy The book will detail how astronomy has progressed through four centuries and contain glimpses of future space research and astronomy goals Uniquely interwoven with the text will be a range of practical projects for backyard astronomers in which to participate projects that serve to illustrate many of Galileo's scientific discoveries

Cosmic Debris John G. Burke, 2023-12-22 Cosmic Debris Meteorites in History offers a comprehensive look into the origins cultural impacts and scientific understanding of meteorites from early skepticism to the transformative discoveries of the last century With millions of meteoroids entering Earth's atmosphere annually only a select few survive to become meteorites that make an impact on Earth often leaving sonic booms fiery trails and in rare cases massive craters This book sheds light on the intricate categorization of meteorite falls witnessed and promptly collected versus finds discovered meteorites whose falls went unseen illustrating the storied history of these celestial objects As early scientists questioned the possibility of stones falling from the heavens a gradual but monumental shift in understanding led to the recognition of meteorites as crucial sources of cosmological astronomical and geological knowledge This volume emphasizes the collaborative evolution of meteoritics showcasing contributions from mineralogists astronomers and other experts who over time developed increasingly sophisticated methods for analyzing meteorite composition and origin Tools like the polarizing microscope mass spectrometers and electron microprobes have expanded our insights into these extraterrestrial bodies and their structures The book also explores the rich folklore surrounding meteorites revealing how different cultures have interpreted feared and revered these remnants of the early Solar System Despite limitations the book covers the intricate science of meteorite reentry impacts and the challenges faced in preserving these fallen stars as symbols of civic pride and scientific curiosity For readers and researchers alike Cosmic Debris offers an engaging narrative of humanity's journey to understand meteorites from ancient lore to modern science This title is part of UC Press's Voices Revived program which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer-reviewed scholarship accessible once again using print on demand technology This title was originally published in 1986
