Espaces et aires protégées Jean-Marie Breton, 2010 Derrière la vitrine et les programmes qui les accompagnent l'appropriation des territoires le tourisme la protection de l'environnement l'implication participative des personnes y résidant par-delà la volonté de faire des espaces protégés les tremplins d'un développement durable quelle est sur place la réalité de ces zones ? Autrement formulé de quel type de tensions et de dissensions sont-elles la source ? Comment se jouent in situ la préservation de la nature la distribution des richesses naturelles ou celles des missions dévolues aux différents intervenants ? Etat acteurs locaux organisations entreprises Quelles disparités au niveau du succès de ces aires selon qu'elles se situent en pays développés ou en pays en voie de développement ? Afin de lever le voile sur les tiraillements nœuds structurels et checs de ces espaces d'abord par le Québec la Guadeloupe Madagascar En plaçant les espaces protégés de quelque nature juridique et administrative qu'ils soient au cœur de sa réflexion ce douzième numéro des *Etudes caribéennes* questionne le revers de la médaille et met jour les dysfonctionnements les demi-checs les vœux pieux les luttes dont ils sont l'objet Se focalisant sur la Caraïbe sans pour autant refuser de dresser un bilan critique de ce type de territoires ailleurs sur le globe les auteurs de ces essais reviennent des problématiques structurelles et socio-économiques qui n'ont rien de locales mais qui concernent plus généralement la difficile capacité de l'humanité à valoriser et gérer ce qu'elle cherche par tous les moyens à fendre

The Green Paradox Hans-Werner Sinn,2012-02-03 A leading economist develops a supply side approach to fighting climate change that encourages resource owners to leave more of their fossil carbon underground The Earth is getting warmer Yet as Hans Werner Sinn points out in this provocative book the dominant policy approach which aims to curb consumption of fossil energy has been ineffective Despite policy makers efforts to promote alternative energy impose emission controls on cars and enforce tough energy efficiency standards for buildings the relentlessly rising curve of CO₂ output does not show the slightest downward turn Some proposed solutions are downright harmful cultivating crops to make biofuels not only contributes to global warming but also uses resources that should be devoted to feeding the world s hungry In The Green Paradox Sinn proposes a new more pragmatic approach based not on regulating the demand for fossil fuels but on controlling the supply The owners of carbon resources Sinn explains are pre empting future regulation by accelerating the production of fossil energy while they can This is the Green Paradox expected future reduction in carbon consumption has the effect of accelerating climate change Sinn suggests a supply side solution inducing the owners of carbon resources to leave more of their wealth underground He proposes the swift introduction of a Super Kyoto system gathering all consumer countries into a cartel by means of a worldwide coordinated cap and trade system supported by the levying of source taxes on capital income to spoil the resource owners appetite for financial assets Only if we can shift our focus from local demand to worldwide supply policies for reducing carbon emissions Sinn argues will we have a chance of staving off climate disaster

Projective Differential Geometry Old and New V. Ovsienko, S. Tabachnikov, 2004-12-13 Ideas of projective geometry keep reappearing in seemingly unrelated fields of mathematics The authors main goal in this 2005 book is to emphasize connections between classical projective differential geometry and contemporary mathematics and mathematical

physics They also give results and proofs of classic theorems Exercises play a prominent role historical and cultural comments set the basic notions in a broader context The book opens by discussing the Schwarzian derivative and its connection to the Virasoro algebra One dimensional projective differential geometry features strongly Related topics include differential operators the cohomology of the group of diffeomorphisms of the circle and the classical four vertex theorem The classical theory of projective hypersurfaces is surveyed and related to some very recent results and conjectures A final chapter considers various versions of multi dimensional Schwarzian derivative In sum here is a rapid route for graduate students and researchers to the frontiers of current research in this evergreen subject

Reclamation Era United States. Bureau of Reclamation, 1947

The Nationality and Statelessness of Nomadic Peoples Under International Law Heather Jean Alexander, 2025 Despite the universal right to nationality many nomadic peoples struggle to claim this fundamental status International law offers solutions to combat statelessness like birth registration but do they work for nomadic peoples The

Nationality and Statelessness of Nomadic Peoples Under International Law delves into the nationality challenges faced by four communities: former Bedouin in Kuwait, Tuareg in Mali, Fulani in Côte d'Ivoire and Sama Dilaut Bajau Laut in Malaysia. Drawing on diverse sources from across disciplines as well as original field research, the book traces the roots of nomadic statelessness from colonization to the present. Through a rigorous legal analysis, the book evaluates how effectively international law addresses these underlying issues and safeguards the right to nationality for those whose lifestyles transcend borders and conventional nation-state structures. Finally, the book proposes reforms to international law to better address the needs of nomadic peoples regarding nationality and citizenship.

A Sustainable Future for the Mediterranean Guillaume Benoit, Aline Comeau, 2012-08-21 Here is a work arriving just at the right moment and contributing new insights at precisely the time when public opinion remains sceptical of the not very promising future we are preparing for our children when governments balk at explaining to their electorates the vital but unpopular decisions that have to be taken and when civil society with few ways and means is finally becoming involved. This remarkable work will help all actors to understand the inter-linkages between economic activities and the environment in the Mediterranean Basin and take concerted effective action to build a positive sustainable future. Mohamed Ennabli, former Minister of the Environment and Land Use Planning, Tunisia. The Blue Plan has carried out a remarkable assessment of the serious environmental problems and insufficiently targeted cooperation in the Mediterranean and also of new financing systems to be implemented which would increase the capacities of local authorities and economic and social partners. Georges Corm, former Minister of Finance, Lebanon. The Mediterranean Basin and its surrounding countries is a microcosm of the environmental and sustainability challenges facing people across the world. Depending on the development path it takes in the future, the region can either become a positive model for the regional regulation of globalization or more onerously, it might reinforce global instability. This unique volume is the definitive authoritative assessment of the environment and development of the Mediterranean Basin and its 22 countries and territories spanning five decades from 30 years in the past to 20 years into the future. Produced by the Blue Plan within the framework of UNEP Mediterranean Action Plan and backed by the EU and national governments, it brings together the work of more than 100 researchers from dozens of national, regional and local governments and research groups into the only comprehensive insight into sustainable development issues in the region. Core coverage includes water, energy, transport, cities, rural and coastal areas as well as related issues such as climate change, population growth, geopolitical changes, unemployment and poverty, pollution, economic and environmental policies, regional cooperation and the Euro-Mediterranean Partnership. Information is clearly presented through hundreds of full-colour maps, graphs, tables and a wealth of case studies. This is a must-have reference for all levels of government, NGOs and libraries as well as practitioners, academics and businesses involved in economics, natural resource management, land and maritime transport, water, energy, infrastructure, urban and rural development, agriculture, fishing and aquaculture, tourism and coastal
