s mandatory FAFSA policy on increasing college enrollment using a difference in differences research design In this analysis I consider rational choice theories and sociological cultural and ecological theories of college going which offer possible explanations as to why we might expect a mandatory FAFSA policy to improve college enrollment rates I find positive impacts on college enrollment among schools who had the lowest pre policy FAFSA completion rates when compared to schools with the highest pre policy completion rates However these positive results appear to be driven by schools with lower proportions of low income students and students of color I find that racial and socioeconomic inequities in college enrollment were maintained or increased into the post policy period Collectively these papers add to the literature on financial aid and the FAFSA by highlighting the important role of school contexts and identifying local state and federal actions that can bolster FAFSA completion and financial aid access

Education,2014-05-24 Federal Student Aid uses the data on your FAFSA to calculate an Expected Family Contribution EFC The EFC is an indicator of your family s financial strength to pay for education after high school Your school will subtract your EFC from your total cost of attendance The result is your financial need The EFC is not the amount of money that your family must provide Rather you should think of the EFC as an index that the college will use to determine how much financial aid grants loans or work study you would receive if you were to attend that school Your application results are transmitted to the school s listed on your FAFSA and the school s uses the EFC amount to determine the amount of financial aid that you are eligible to receive Many states and schools also use the FAFSA data to award aid from their programs Some states and schools also may require you to complete additional applications Completing and submitting a FAFSA is free whether you file electronically or on paper
