J. DiMaio, 2001-06-28 Medicolegal investigation of death is the most crucial and significant function of the medical examiner within the criminal justice system. The medical examiner is primarily concerned with violent sudden unexpected and suspicious deaths and is responsible for determining the cause and manner of death, identifying the deceased, determining the age, and recording the findings. *Paediatric Forensic Medicine and Pathology, Second Edition* Anthony Busuttill, Jean Keeling, 2008-11-28 Child abuse and suspicious child deaths are very complicated matters for clinicians, pathologists, law enforcement officials, and legal professionals to investigate. Meanwhile, the evidence base for forensic pathology, especially in paediatrics, is steadily growing. In *Paediatric Forensic Medicine and Pathology*, two internationally acclaimed editors have brought together a first class author team who provide an up to date comprehensive and thorough review of the contemporary problems encountered in practice today. Individual chapters explore the emerging role of imaging in the diagnosis of non accidental injury and compare recent evidence contrasting sudden infant death and SIDS. The head and neck injury chapter carefully explores the shaken baby syndrome and similar patterns of injury that have recently gained widespread media attention. Special emphasis is given to interview and assessment procedures and useful clinical forms are included throughout the book. Whether in a clinical laboratory or legal setting, readers dealing with forensic inquiries or who are in preparation for court will find the comprehensive background and evidence base necessary to support their investigations. *Paediatric Forensic Medicine and Pathology* is an invaluable resource for forensic pathologists, paediatric pathologists, and paediatricians, as well as all practitioners in the judicial and legal criminal investigation and social services systems that have to deal with such cases.
