a programmer wanting to learn how to integrate reports within a NET application I've been working with Crystal Reports since Visual Basic 3 and it's always been difficult to find technical information on report writing I spent a year and a half researching what NET programmers need to successfully create implement and deploy a Crystal Reports application I even put the book on the internet for everyone to read for free all of last year This generated an incredible number of emails from programmers telling me what they liked disliked and what was missing from the book I learned that there are two distinct types of NET programmers using Crystal Reports The first type of programmer doesn't have much experience with Crystal Reports and wants a series of tutorials to help them build reports from scratch For this programmer I wrote 13 chapters which teach you everything about adding reports to ASP NET and Windows applications It starts with the basics of building reports to adding charts crosstab reports sorting and grouping subreports and using the formula editor with Basic syntax and Crystal syntax The second type of programmer has been using Crystal Reports for years and is mostly concerned with how to do technical runtime customization of reports For this programmer I researched and diagrammed the undocumented report object models I included dozens of examples in both VB NET and C to show you how to modify reports manipulate different data sources XML ADO NET ODBC OLE DB stored procedures with parameters modify formulas and report parameters and integrate NET with the RAS and RDC The dozens of emails I received when the book was online were instrumental for doing a major revision of many chapters before publishing the book in hardcopy format Since releasing the book I continue to receive more emails from people They regret that the free book isn't online anymore but understand that it couldn't last forever and that the hardcopy version is even better I hope you like it and that it helps you achieve your reporting goals

September 2004 Update Due to high demand I did a second printing of the book I took advantage of this opportunity to go through the book and remove all grammatical errors The content is the same but the typos have been corrected

The Black Sheep Brian Duffy, 2006-10 In his family's eyes Layne Marks has always been a failure The undesirable sheep living in his more prosperous brother's shadow He still struggles to maintain a steady employment or place to live at the age of 26 Anywhere else in the world just another common person but not in Eumain Imperfection is no longer tolerated in Eumain Both a bank robber and a homeless person will suffer the same punishment in this situation they will both be labelled Rejects and taken away never to be seen again The residents have no way of knowing what will happen to them According to a persistent rumour the Rejects have been exiled to a remote long forgotten place because they are unfit to live anywhere else just like themselves There all of the criminals of all degrees must rely on one another in order to survive in this harsh and perilous environment that is home to a variety of previously unheard of monsters Layne Marks has always been warned that he was close to becoming deemed unfit to reside in Eumain and that it was only a matter of time

Crystal Reports 10: The Complete Reference George Peck, 2004-07-09 Produce winning presentations and reports with expert advice from this definitive guide Discover vital tips on how to best utilize Crystal Reports features to analyze data and build professional

complex and effective reports Find the entire spectrum of user knowledge from advice for new users on how to develop design and build a simple report to in depth information on complex features such as Crystal Server Pages and integrating Crystal Reports into Visual Basic NET programs *Crystal Reports 2008 For Dummies* Allen G.
