Fort Hare University Study Guide 2015

Fred M. Hayward

Fort Hare University Study Guide 2015:

International Environments and Practices of Higher Education Andrea Caputo, Deborah Lock, Dieu Hack-Polay, 2022-10-31
This book provides a critical review of the teaching practices in higher education in international contexts. Sticky problems and debates about inclusivity, diversity and cultural representation in the curriculum and classroom are explored through the eyes of the academics who negotiate complex teaching landscapes.

Revisiting Environmental and Natural Resource Questions in Sub-Saharan Africa Wilson Akpan, Philani Moyo, 2017-06-23
Based on case studies in Southern Africa, West Africa and East Africa, this book revisits some of the dilemmas and paradoxes associated with the development, management and utilisation of environmental resources as well as the official handling of climate change related challenges in Sub-Saharan Africa. On the subject of natural resource exploitation, in particular, the book revisits scholarly debates and specific practices around compensation, benefit and burden sharing, local participation and space/place dynamics. It highlights fundamental ambiguities in the ways the dominant discourses and policy responses have been framed and mobilised and examines epistemic and ideational incongruences that have hobbled and sometimes negated the effectiveness of otherwise well intentioned interventions. On climate change, the book revisits debates around the vulnerability assets nexus with regard to mitigation and adaptation as well as the intersection of climate information and livelihoods in agro-based settings. The contradictions, gaps and limitations of climate change policies and strategies in different regions are re-examined based on new data. In the last few years, the Environment and Natural Resources Working Group of the South African Sociological Association (SASA) has intensified efforts to go beyond the annual SASA Congresses and the production of journal articles in making the research agendas of its members more visible to the global scholarly and policy community. This book is one result of such efforts. It calls for a constant questioning of orthodoxies and the promotion of ethnographically sensitive and epistemologically nuanced scholarly and policy approaches to developmental challenges in Africa, especially in relation to environmental resources and environmental change.

Transforming Higher Education in Asia and Africa Fred M. Hayward, 2020-03-01
Drawing on over fifty years of on-the-ground experience, Fred M. Hayward's *Transforming Higher Education in Asia and Africa* analyzes change processes in higher education in eight Asian and African countries. The twelve cases range from the push to upgrade and transform higher education in Afghanistan in the midst of a war to the successful struggle against apartheid in South African institutions as well as thwarted efforts in Sierra Leone and Madagascar. Providing both practical lessons learned and hope for communities globally, Hayward demonstrates that higher education change and even transformation, which is more fundamental and structural, can occur even in the most difficult environments. Successful transformation requires well-crafted strategic and budget plans with careful implementation, monitoring and effective leadership at multiple levels. Yet also critical are a commitment to human development, a desire for freedom and belief in democracy and recognition that high quality higher education is essential to national development.
