Garlen, Lisa Farley, 2021-05-13 What is a child The concept of childhood is so familiar that we tend to assume its universality However the meaning of childhood is always being negotiated not only by the imaginations of adults but also by nations markets history and children themselves Yet as much as the question is considered by the social world the contributions in this book remind readers that children are also active embodied and inquiring agents engaged in figuring a relationship with that the world they inherit This book s unifying theme The child in question emerges from an assertion that childhood has boundaries far more elastic than can be held by the familiar notion of the innocent child developing toward a heteronormative future The title pays homage to the work of

sociologist Diana Gittins who over twenty years ago asked how the shifting meanings of children and childhood impact the lives of children The contributions of this book examine contemporary educational policy and practice curriculum material literary and visual representations and teacher narratives to further probe how and why it matters that childhood as a concept and experience remains as multiple and elusive as ever The chapters in this book were originally published as a special issue of the journal Curriculum Inquiry
