Science Education in Canada Christine D. Tippet, Todd M. Milford, 2019-07-01 This book offers a meso level description of demographics science education and science teacher education Representing all 13 Canadian jurisdictions the book provides local insights that serve as the basis for exploring the Canadian system as a whole and function as a common starting point from which to identify causal relationships that may be associated with Canada's successes The book highlights commonalities consistencies and distinctions across the provinces and territories in a thematic analysis of the 13 jurisdiction specific chapters Although the analysis indicates a network of policy and practice issues warranting further consideration the diverse nature of Canadian science education makes simple identification of causal relationships elusive Canada has a reputation for strong science achievement However there is currently limited literature on science education in Canada at the general level or in specific areas such as Canadian science curriculum or science teacher education This book fills that gap by presenting a thorough description of science education at the provincial territorial level as well as a more holistic description of pressing issues for Canadian science education

Understanding Test and Exam Results Statistically

Kaycheng Soh, 2016-08-09 This book shares the goal of the classic text How to Lie with Statistics namely preventing and correcting statistical misconceptions that are common among practitioners though its focus is on the educational context It illustrates and discusses the essentials of educational statistics that will help educational practitioners to do this part of their job properly i.e. without making conceptual mistakes The examples are cast in the school classroom contexts based on realistic rather than theoretical examples The strongest aspect of the work or author's view is that the author can put himself in the shoes of teachers and make the work a very practical guide for teachers and school leaders As a very experienced educator and researcher the author knows very well about the knowledge skills that are essential for the professional development of teachers He is able to explain the statistical and measurement concepts in plain language and with examples that are highly relevant to the target audience In addition the author also conveyed an important message to the target audience throughout the work by pointing out the mistakes and misunderstandings of the interpretation of test scores and measurement design The author reminds the audience about the importance of proper use of tests and test scores when teachers and school leaders make any education decisions which has much implication on the professional integrity of teachers and school leaders Dr Joyce Kwan The Education University of Hong Kong Hong Kong This book covers all the statistical tools for analyzing educational data and provides examples to explain the ideas Chapters 10-17 are practical data analysis in educational data that helps readers have a better understanding of the procedure to analyze the data Dr Alpha Ling The Education University of Hong Kong Hong Kong It looks like a very interesting book with attractive topics and practical problems in educational statistics Though the topics remind me of the classic book How to Lie with Statistics this book aims at preventing and correcting statistical misconceptions in educational context Dr Zhu Ying National Institute of
