investigates Unmanned Aircraft Systems UAS with a payload capacity of one metric ton for transportation The authors  
provide a large variety of perspectives from economics to technical realization With the focus on such heavy lift cargo UAS  
the authors consider recently established methods for approval and certification which they expect to be disruptive for  
unmanned aviation In particular the Specific Operations Risk Assessment SORA and its impact on the presented  
technological solutions and operational concepts are studied Starting with the assumption of an operation over sparsely  
populated areas and below common air traffic diverse measures to further reduce operational risks are proposed Operational  
concepts derived from logistics use cases set the context for an in depth analysis including aircraft and system design safe  
autonomy as well as airspace integration and datalinks Results from simulations and technology demonstrations are  
presented as a proof of concept for solutions proposed in this book      **Airman's Information Manual** ,1968      Sport
