**Encyclopedia of Science and Technology Communication** Susanna Hornig Priest, 2010-07-14 The explosion of scientific information is exacerbating the information gap between richer poorer educated less educated publics The proliferation of media technology and the popularity of the Internet help some keep up with these developments but also make it more likely others fall further behind This is taking place in a globalizing economy and society that further complicates the division between information haves and have nots and compounds the challenge of communicating about emerging science and technology to increasingly diverse audiences Journalism about science and technology must fill this gap yet journalists and journalism students themselves struggle to keep abreast of contemporary scientific developments Scientist aided by public relations and public information professionals must get their stories out not only to other scientists but also to broader public audiences Funding agencies increasingly expect their grantees to engage in outreach and education and such activity can be seen as both a survival strategy and an ethical imperative for taxpayer supported university based research Science communication often in new forms must expand to meet all these needs Providing a comprehensive introduction to students professionals and scholars in this area is a unique challenge because practitioners in these fields must grasp both the principles of science and the principles of science communication while understanding the social contexts of each For this reason science journalism and science communication are often addressed only in advanced undergraduate or graduate specialty courses rather than covered exhaustively in lower division courses Even so those entering the field rarely will have a comprehensive background in both science and communication studies This circumstance underscores the importance of compiling useful reference materials The Encyclopedia of Science and Technology Communication presents resources and strategies for science communicators including theoretical material and background on recent controversies and key institutional actors and sources Science communicators need to understand more than how to interpret scientific facts and conclusions they need to understand basic elements of the politics sociology and philosophy of science as well as relevant media and communication theory principles of risk communication new trends and how to evaluate the effectiveness of science communication programmes to mention just a few of the major challenges This work will help to develop and enhance such understanding as it addresses these challenges and more Topics covered include advocacy policy and research organizations environmental and health

**Solar Energy Update** ,1984-05     *Work* Steven Vallas,2013-12-23 This book provides a critical overview of the myriad literatures on work viewed not only as a product of the marketplace but also as a social and political construct Drawing on theoretical and empirical contributions from sociology history economics and organizational studies the book brings together perspectives that too often remain balkanized using each to explore the nature of work today Outlining the fundamental principles that unite social science thinking about work Vallas offers an original discussion of the major theoretical perspectives that inform workplace analysis including Marxist interactionist feminist and institutionalist schools of thought Chapters are devoted to the labor process to workplace flexibility to gender and racial inequalities at work and to the link between globalization and the structure of work and authority today Major topics include the relation between work and identity the relation between workplace culture and managerial control and the performance of emotional labor within service occupations This concise book will be invaluable to students at all levels as it explores a range of insights to make sense of pressing issues that drive the social scientific study of work today     **Transformative Work Design** Sharon K.

Parker,2025 A rise in work related mental health issues the accelerating implementation of highly disruptive digital technologies and an ageing population are all critical societal trends that call for more attention to the design of healthy productive and meaningful work Against this background this chapter presents an integrative framework of work design The framework depicts a multi level approach to work characteristics which shape various outcomes and which in turn are influenced by individual team organizational and macro level antecedents We map each Part of the book and the chapters therein against this framework so as to guide the reader through the book It is our hope that through inspiring novel research and evidence based practice this book helps us to realize the transformative impact of work design for all workers

**Knowledge, Power, and Participation in Environmental Policy Analysis** Rob Hoppe,2018-01-16 This volume probes practical dilemmas and competing research perspectives in environmental policy analysis Scholars working in different fields research traditions societies and policy domains offer significant insights into the processes and consequences of environmental policy making Part 1 Coping with Boundaries describes present day conflict between experts and greater

public participation in environmental policy It shows that the institutionalization of increasingly complex environmental problems has led to a conflict between technocracy and democracy Part 2 The Transnational Challenge examines modes of cooperation between grassroots movements scientists and regional authorities in the United States and Canada These and other modes of cooperation laid the foundations for the Great Lakes Water Quality Agreement increased the effectiveness of air pollution treaties and increased climate change Part 3 Bio Hazards Policies and Paralysis deals with environmental problems closest to the everyday concerns of the public at large because they have immediate implications for food safety and other values Part 4 The Citizens Perspective focuses on citizen vis a vis environmental policy noting that in order to make policies work citizens must be willing and able to participate in policy making and cooperate in implementing environmental choices Part 5 Confronting Ordinary and Expert Knowledge explores opportunities and constraints affecting public participation in evaluation of science Part 6 Developments in Research Programming addresses such questions as whether scientists still have opportunities to do the research they want without being interrupted or disturbed by policy makers and other stakeholders Part 7 Policy Sciences Aspirations explores different avenues for improving environmental policy Volume twelve in the PSRA series should inspire further investigations of the relations among knowledge power and participation in environmental policy It will be of timely interest to environmentalists policy makers scholars and the general public
