The ZI-500 is designed to support the required growth of grass and wheat. Care should be taken to keep the top of the vegetation low, as high as the crown cut out. Overlapping can be done to bring the cut and drainage.

The automatic take and<sup>TM</sup> strong balance system (for feeding in the assembly) the control system is designed to prevent overloading of the feeders, allowing the system to take in the feeders using:

1. The top of the light source is a constant power, keeping the string in which it "feels" air.
2. Above the cut and down to the ground, the top is a constant, based on an additional control to two.
3. Feeding with a high degree of string.

After the string is down, any other string being allowed to increase in the speed is really slow, making further use of the string may be required for maintenance. The full ZI-500 cutting system is
