

1-2 DESCRIPTION & OPERATION

one person, watercraft manufacturers were quick to respond. Today, most modern craft are powered with a twin cylinder or three-cylinder two-stroke powerplant, coupled to a single stage pump.

Aftermarket shops and manufacturers have come into existence all across the United States and Canada. Their output of specialty products and services permit the owner to gain more speed and in over the competition at racing events wherever enough water is available.

As mentioned in the "Foreword", this book has been designed and written to cover stock, factory "out the door" engines and jet drives. Modifications for higher than manufacturer's rated performance are so extensive and varied, no attempt has been made to include them in this volume. (Actually, for such coverage, a separate comprehensive book would be required.) In such cases the publisher's recommendation is to follow the after market instruction with the particular product or service.

Overall view of the popular Model 750 Series twin cylinder installation.

1-2 PRINCIPLES OF OPERATION

One of the first lessons to be learned in any elementary physics class is Newton's basic law: "For every force, there is an opposite and equal force". This statement is the basic principle of the jet pump. Water is "sucked" and "scooped" in from under the craft by a powerful pump rotating at incredible speed and then discharged, "blown" out, sternward in the opposite direction. In this manner the watercraft is propelled forward.

The personal water craft covered in this manual are all equipped with a twin or 3-cylinder water cooled two-stroke engine, matched with a single stage (one impeller) jet pump.

On a very few models, a reverse "gate" is swung down over the pump outlet nozzle forcing the exhausted water back in a forward direction thus moving the craft sternward.

Personal watercraft jet pumps may be classified as "axial flow" or "mixed flow".

Many times the Model 900ZX Series engine is modified with aftermarket equipment and service for higher than factory "out-the-door" performance.
