

PERIODIC MAINTENANCE

Proper maintenance, including periodic inspection and regular lubrication is essential to the long life and trouble-free operation of your new Massey-Ferguson Mower. This section of your manual is devoted entirely to maintenance and should be referred to when regular servicing is performed.

LUBRICATION

Care should be taken when handling all lubricants. Open containers collect dirt which may damage the lubricated parts. Always wipe off grease fittings and filler plugs before lubrication to prevent the entrance of dirt.

The components listed in this section should be lubricated regularly at the periods indicated.

There are 15 pressure grease fittings on the MF 31 Mower (including two on the PTO shaft). The position of these fittings is indicated in Figs. 1 and 2.

The following table indicates the periods at which lubrication should be carried out:

Pressure Grease Fittings—8 Hours

Lubricate fittings 7 to 15* after each 8 hour operating period. Lubricate fitting No. 8 every two or three hours in extremely dry, dusty, or extremely wet conditions.

Fig. 1 - Lubrication Points

1 thru 6. Lubricate According to Decal.
7 thru 9. Lubricate 8-Hour Periods.
10. Knife Head Lubrication Point (Below Belt Indicated). 8-Hour Periods.

PTO Shaft—3 Times Per Season

Approximately three times during the operating season, the two halves of the PTO shaft should be slipped apart and the square inner shafts lubricated thoroughly with light grease or a heavy lubricating oil.

Drive Unit—As Specified

The drive unit should be lubricated according to the instructions on the plate attached to the top inside surface of the drive unit. A facsimile of this plate is shown at Fig. 3. Avoid excessive lubrication of the sealed bearings in this unit. Excessive grease in these bearings may overload them causing overheating, plus breakage of the seals and eventually leading to the bearings running dry. One or two pressure strokes of the grease gun at the intervals indicated on the lubrication plate (Fig. 3) are all that are required.

NOTE: When pressure lubricating all components apart from the drive unit

Fig. 2 - Lubrication Points

11 thru 15. Lubricate 8-Hour Periods.

*For No. 15 fitting, refer to "Note" and paragraph which follows at the end of "Drive Unit" heading.
