

# **ME2304 ENGINEERING METROLOGY AND MEASUREMENTS**

**Metrology** is the science of measurement. Metrology includes all theoretical and practical aspects of measurement. Metrology is defined as "the science of measurement, embracing both experimental and theoretical determinations at any level of uncertainty in any field of science and technology."

## **OBJECTIVES**

- To understand the basic principles of measurements
- To learn the various linear and angular measuring equipments, their principle of operation and applications.
- To learn about various methods of measuring Mechanical parameters
- To gain some fundamental knowledge about metrology and measurements and Definition of internationally accepted unit of measurement.
- Realisation of the units of measurement in practice

**Engineering Metrology and Measurements** N. V. Raghavendra, L. Krishnamurthy, 2013 Engineering Metrology and Measurements is a textbook designed for students of mechanical production and allied disciplines to facilitate learning of various shop floor measurement techniques and also understand the basics of mechanical measurements With a conventional introduction to the principles and standards of measurement the book in subsequent chapters takes the reader through the important topics of metrology such as limits fits and tolerances linear measurements angular measurements comparators optical measurements The last few chapters discuss the measurement concepts of simple physical parameters such as force torque strain temperature and pressure before introducing the contemporary information on nanometrology as the last chapter Adopting an illustrative approach to explain the concepts the book presents solved numerical problems practice problems review questions and multiple choice questions     Engineering Metrology and Measurements
