Evaluating Fetal Alcohol Spectrum Disorders in the Forensic Context Natalie Novick Brown, 2021-08-28 This book is intended for medical and mental health clinicians faced with the challenge of evaluating adolescents and adults in the legal context who may have a fetal alcohol spectrum disorder (FASD). Luminaries in their respective fields, the contributors to this book offer a range of expertise and perspectives regarding the forensic investigation of FASD, medical, psychological, psychiatric, criminal defense, prosecution, and the judiciary. The primary goal of the book is to provide medical and mental health clinicians with practical procedures that can be used in a variety of forensic and clinical settings. It includes protocols that have been used successfully in legal matters ranging from rights waiver and competency to capital murder and sexual offending.
