Handbook of Global Economic Governance Manuela Moschella, Catherine Weaver, 2013-12-17 Since the summer of 2007 the world scenario has been dominated by the US sub prime mortgage crisis and its repercussions on global financial markets and economic growth As banks around the world wrote down their losses and governments intervened to rescue domestic financial institutions financial distress severely hit the real economy leading to what has been widely defined as the worst recession since the 1930s Under these conditions along with the immediate concern for stemming the effects of the crisis policy makers around the world have been debating the long term measures that have to be adopted in order to reduce the likelihood of future crises and to ensure stable economic growth Although this debate has not yet produced significant transformations it indicates a renewed concern about the institutional architecture that is meant to govern the global economic and financial system This book tackles the issue of what the governance of the global economic and financial system looks like and what the prospects for its reform are Specifically the book will address the following three main themes Governance What is governance in the international economic system What forms does it take How did it come about How can we study it Functions of governance What are the functions of global economic governance Who performs them What are the rules and mechanisms that make global governance possible Problems and prospects of governance What are the problems in global economic governance Is there a trade off between legitimacy and efficiency What are the prospects for reform of global economic governance in the aftermath of the global financial crisis This book will _ Provide a thorough analysis of the issues at stake in designing international rules and institutions able to govern the global economy _ Illustrate and analyze virtually all the main institutions rules and arrangements that make up global economic governance inscribing them within the function these institutions rules and arrangements are meant to perform _ Discuss the problems that affect today s global economic governance and assess alternative proposals to reform the international financial architecture

Japanese Development Cooperation André Asplund,Marie Soderberg,2016-12-19 The world order as we know it is currently undergoing profound changes and in its wake so is foreign aid Donors of foreign aid development assistance or development cooperation around the world are already facing new challenges in the changing development architecture This is an architecture that globally seems to become increasingly forgiving of foreign aid as a win win concept that also meets the donors own national interests something that has been an unofficial Japanese trademark for many years This book examines Japan s development assistance as it transitions away from Official Development Assistance and towards Development Cooperation In this transition the strong and reciprocal relationships between Japanese development policy and comprehensive security diplomacy foreign domestic and economic policies are likely to become even more consolidated and integrated The utilization of and changes within Japanese development policy therefore affects not only recipients of foreign aid but also the relationships Japan enjoys with its allies and strategic partners as well as the relations to competing donors and rivals in the region and around the world Japanese foreign aid as such provides an extremely interesting case from where regional and even global changes can be understood Written by a multidisciplinary team of contributors from the fields of political science international relations development economics public opinion and Japan studies the book sets out to be innovative in capturing the essence of the changing patterns of development

Towards a Better Global Economy Franklin Allen, Jere Richard Behrman, Nancy Birdsall, Shahrokh Fardoust, Dani Rodrik, Andrew D. Steer, Arvind Subramanian, 2014 Substantial progress in the fight against extreme poverty was made in the last two decades But the slowdown in global economic growth and significant increases in income inequality in many developed and developing countries raise serious concerns about the continuation of this trend into the 21st century The time has come to seriously think about how improvements in official global governance coupled with and reinforced by rising activism of global citizens can lead to welfare enhancing and more equitable results for global citizens through better national and international policies This book examines the factors that are most likely to facilitate the process of beneficial economic growth in low middle and high income countries It examines past present and future economic growth demographic changes the hyperglobalization of trade the effect of finance on growth climate change and resource depletion and the sense of global citizenship and the need for global governance in order to draw longer term implications identify policy options for improving the lives of average citizens around the world and make the case for the need to confront new challenges with truly global policy responses The book documents how demographic changes convergence and competition are likely to bring about massive shifts in the sectoral and geographical composition of global output and employment as the center of gravity of the global economy moves toward Asia and emerging economies elsewhere It shows that the legacies of the 2008 09 crisis high unemployment levels massive excess capacities and high debt levels are likely to reduce the standard of living of millions of people in many countries over a long period of adjustment and that fluctuations in international trade financial markets and commodity prices as well as the tendency of institutions at both the national and international level to favor the interests of the better off and more powerful pose substantial risks for citizens of all countries The chapters and their policy implications are intended to stimulate public interest and facilitate the exchange of ideas and policy dialogue

also compares the Chinese way of development cooperation with that of the traditional donors particularly the OECD DAC members and calls for a broadening understanding for international development cooperation that can allow win win ideology and embrace diversified cooperation forms beyond the official development assistance ODA
