

Equipment Maintenance Plan

The mission of the Regional Transit System (RTS) is to provide safe, reliable, clean, and well-maintained vehicles throughout the useful life of the asset. The function of the maintenance plan is to provide a consistent systematic program that will enable RTS to properly inspect, maintain and service vehicles while following the manufacturer's recommended maintenance schedule(s).

Maintenance Plan Goals

It is the goal of RTS to operate a maintenance program using proven fleet management practices. Scheduling work allows time, materials, tools, equipment, and labor to be effectively managed. A maintenance plan has been adopted to make these goals attainable.

The maintenance plan is a "living document" including schedules and reports which will be updated periodically to reflect changes in maintenance policies, equipment, and program improvements.

The goals of the maintenance plan include:

- An effective preventive maintenance program;
- Defect Reporting;
- The proper management of parts, equipment, and fleet;
- A warranty recovery program;
- Quality assurance

Fleet Summary

A physical inventory of equipment is kept on file by both the City's property control personnel and RTS. The fleet information is updated as changes occur in the fleet inventory.
