Factor Impact Journal List:

Numerical Correlation between Impact Factor and Web Ranking of Electronic Scientific Journals Using Regression Analysis Giorgos Kouropoulos, Γιώργος Κουρόπουλος, 2017-12-15 The present study attempts to examine the numerical correlation between web ranking of electronic scientific journals and impact factor of these journals using the method of regression analysis Regression analysis allows the option of investigating and predicting the numerical relationship between website ranking of scientific journals on the World Wide Web and the value of impact factor of the journals A sample of 57 publishers with 6 272 scientific journals and 50 standalone scientific journals was analyzed during research procedure In this study two different indicators about websites classification on World Wide Web were examined separately for 57 publishers and 50 standalone journals Alexa rank and Statscrops rank The electronic databases through the internet constitute the main information resources of this study about the impact factors The general conclusion that arises is that the impact factor of electronic scientific journals illustrates a very strong positive correlation with classification of websites on the World Wide Web Furthermore it is concluded that the change of web ranking as a function of impact factor is governed by a Gaussian function or rational function with lower Pearson coefficient and presents non linearly correlation Even if there is very strong correlation between impact factor and web rank for electronic journals the prediction of impact factor from web rank is not possible and presents many divergences

Collection Evaluation in Academic Libraries Karen C. Kohn, 2015-06-24 Librarians have long used data to describe their collections Traditional measures have simply been inputs and outputs volumes acquired processed owned or circulated With the growth since the 1990s of cultures of assessment librarians have sought statistics that are evaluative rather than simply descriptive More recently exponentially increasing journal prices and an economic recession have intensified the need to make careful purchasing decisions and to justify these to administrators A methodical evaluation of a library collection can help librarians understand and meet user needs and can help communicate to administrators that the library is a good use of the institution s money Collection Evaluation in Academic Libraries A Practical Guide for Librarians equips collections managers to select and implement a method or several methods of evaluating their library collections It includes sections on four tools for evaluation Comparison to peer institutions Core lists Usage statistics from circulation and ILL Citation analysis Chapters on each of these approaches present the advantages and disadvantages of each method instructions on data collection and analysis with screenshots and suggested action steps after completing the analysis With a unique combination of step by step instructions and discussions of the purpose and role of data this book provides an unusually thorough guide to collection evaluation It will be indispensable for collection development librarians and anyone looking to strengthen the culture of assessment within the library

Impact and the Management Researcher Usha C.V. Haley, 2021-10-07 Universities governments faculty evaluation committees grant bestowing institutions scholars and accreditation organizations have increasingly insisted on identifying and placing value on

research impact Valuation of research and scholarly output predicts innovation affects careers and guides resource allocations worldwide This book joins the burgeoning conversation in management and the social sciences with theoretical and applied discussions of the concepts measurements costs and benefits that accrue to pursuing scholarly impact The author draws on a pioneering study by the Academy of Management that asked its global membership of 20 000 how they assessed scholarly impact including rankings and impact factors and how institutions supported this pursuit Through qualitative and quantitative cross country analysis by professorial rank geographical region and support for various metrics as well as exploration of parallel discussions in the social and hard sciences the author argues for an urgent re examination of the visible and invisible hands of research evaluation that shape lives and global societies The book presents original data on the external impacts of management research on policy through the media and in interest displayed by constituencies which will make the book of interest to researchers academics and students in the fields of business and management Recommendations from leading management scholars and from the data follow for more valid more reliable and less cynical metrics of research impact

International Relations in France Henrik Breitenbauch,2013-06-19 Why is the French International Relations IR discipline different from the transnational American discipline By analysing argument structures in research articles across time this book shows how the discipline in France is caught between the American character of the discipline and the French state as regulator of legitimate forms of expression Concretely French research arguments are less explicit about what their propositions are and what academic discussions they draw on and add to than their transnational American counterparts Based on a comparative case study of French and American IR research from 1950 to 2011 the book is a major contribution to the meta IR literature on global regional and national traditions of IR The challenge to the French discipline of whether and how to position itself in relation to the evolving American discipline is in many ways exemplary for other non American national IR disciplines and the choices as well as the structural conditions underlying the French case are relevant to all non Western disciplines The comparative analysis moreover reveals that the modern American discipline what is

considered as recognisable social science takes shape only during the 1970s The book thus offers new knowledge about the discipline s international development as such Both case and methodology are interesting to larger audiences outside IR in the history and sociology of social science contrastive rhetoric as well as French and cultural studies ECKM 2020 21st European Conference on Knowledge Management Professor Alexeis Garcia-Perez,2020-12-02 Information Management in the New Millennium ,2002 Papers presented at the Nineteenth Annual Convention of the Society for Information Science and Conference on Information Management in the New Millennium held at New Delhi during 27 29 January 2000 with special reference to India *Informetrics* Junping Qiu,Rongying Zhao,Siluo Yang,Ke Dong,2017-04-08 This book provides an accessible introduction to the history theory and techniques of informetrics Divided into 14 chapters it develops the content system of informetrics from the theory methods and applications systematically analyzes the six basic laws and the theory basis of informetrics and presents quantitative analysis methods such as citation analysis and computer aided analysis It also discusses applications in information resource management information and library science science of science scientific evaluation and the forecast field Lastly it describes a new development in informetrics webometrics Providing a comprehensive overview of the complex issues in today s environment this book is a valuable resource for all researchers students and practitioners in library and information science Libraries without Limits: Changing Needs — Changing Roles Suzanne Bakker,2012-12-06 Proceedings of the 6th European Conference of Medical and Health Libraries Utrecht 22 27 June 1998 MEDINFO 2019: Health and Wellbeing e-Networks for All L.
