Rethinking Securities in an Emergent Technoscientific New World Order Mawere, Munyaradzi, Nhemachena, Artwell, 2018-03-13 The emergent technoscientific New World Order is being legitimised through discourses on openness and inclusivity The paradox is that openness implies vulnerability and insecurities particularly where closure would offer shelter While some actors including NGOs preach openness of African societies Africans clamour for protection restitution and restoration Africans struggle for ownership and access to housing for national cultural religious economic and social belonging that would offer them the necessary security and protection including protection from the global vicissitudes and matrices of power In the presence of these struggles to presuppose openness would be to celebrate vulnerability and insecurities This book examines ways in which emergent technologies expose Africans and more generally peoples of the global south to political economic social cultural and religious shocks occasioned by the colonality of the global matrices of power It notes

that there is the use by global elites of technologies to incite postmodern revolutions designed to compound the vicissitudes and imponderables in the already unsettled lives of people north and south Particularly targeted by these technologies are African and other governments that do not cooperate in the fulfilment of the interests of the hegemonic global elites The book is handy to students and practitioners in security studies African studies development studies global studies policy studies and political science **Contemporary Architects** Muriel Emanuel, 2016-01-23
