Design Thinking Research
Hasso Plattner, Christoph Meinel, Larry Leifer, 2015-09-08. This book summarizes the results of Design Thinking Research carried out at Stanford University in Palo Alto, California, USA, and Hasso Plattner Institute in Potsdam, Germany. The authors offer readers a closer look at Design Thinking with its processes of innovations and methods. The contents of the articles range from how to design ideas, methods, and technologies via creativity experiments and wicked problem solutions to creative collaboration in the real world and the connectivity of designers and engineers. But the topics go beyond this in their detailed exploration of design thinking and its use in IT systems engineering fields and even from a management perspective. The authors show how these methods and strategies work in companies, introduce new technologies and their functions, and demonstrate how Design Thinking can influence as diverse a topic area as marriage. Furthermore, we see how special design thinking uses functions in solving wicked problems in complex fields. Thinking and creating innovations are basically and inherently human, so is Design Thinking. Due to this, Design Thinking is not only a factual matter or a result of special courses, nor of being gifted or trained; it's a way of dealing with our environment and improving techniques, technologies, and life.

Conservation Drones Serge A. Wich, Lian Pin Koh, 2018-05-31. Increasing numbers of ecologists and conservation biologists have begun to explore the use of drone technology to obtain accurate and up-to-date data on the distribution and density of species, as well as the threats to their habitats, in their ongoing attempts to conserve and monitor biodiversity. Conservation drones are low-cost, autonomous, and operator-friendly unmanned aerial vehicles that can be used for surveying, mapping, and monitoring both habitat and biodiversity. They are fast becoming a valuable complement to ground-based surveys and satellite imagery for a wide range of ecological and conservation applications. The authors pioneered the use of conservation drones for the purpose of monitoring orangutan populations in Southeast Asia. They subsequently founded ConservationDrones.org to share their knowledge of building and using drones with colleagues in the wider environmental
