Its motion is described as accelerated since it is always changing direction even if it maintains a constant speed of 22 km/h.
7. If an object is said to have uniform motion, then what does one know about its velocity? about its acceleration?  
An object with uniform motion has a constant velocity. It has no acceleration since constant velocity means the object's speed and direction remain the same.
8. Draw all motion graphs that represent no motion or zero velocity.
