Concha-Holmes,Anthony Oliver-Smith,2019-10-11 Long considered ground zero for global climate change in the United States Florida presents the perfect case study for disaster risk and prevention Building on the idea that disasters are produced by historical and contemporary social processes as well as natural phenomena Amanda D Concha Holmes and Anthony Oliver Smith present a collection of ethnographic case studies that examine the social and environmental effects of Florida s public and private sector development policies Contributors to *Disasters in Paradise* explore how these practices have increased the vulnerability of Floridians to hurricanes tornadoes floods droughts frosts and forest fires Planning for Climate Change Simin Davoudi,Jenny Crawford,Abid Mehmood,2009-09-02 Climate change is changing the context of spatial planning and shaping its priorities It has strengthened its environmental dimension and has become a new rationale for coordinating actions and integrating different policy priorities This book sets out the economic social and environmental challenges that climate change raises for urban and regional planners and explores current and potential responses These are set within the context of recent research and scholarly works on the role of spatial planning in combating climate change Addressing both mitigation measures for reducing greenhouse gas emissions and adaptation to

the effects of climate change the book provides an overview of emerging practice with analysis of the drivers of policy change and practical implementation of measures It scopes planning issues and opportunities at different spatial scales drawing on both the UK and international experiences and highlighting the need to link global and local responses to shared risks and opportunities

A Handbook of Sustainable Building Design and Engineering Dejan Mumovic,Mat Santamouris,2013-06-17 The combined challenges of health comfort climate change and energy security cross the boundaries of traditional building disciplines This authoritative collection focusing mostly on energy and ventilation provides the current and next generation of building engineering professionals with what they need to work closely with many disciplines to meet these challenges A Handbook of Sustainable Building Engineering covers how to design engineer and monitor a building in a manner that minimises the emissions of greenhouse gases how to adapt the environment fabric and services of existing and new buildings to climate change how to improve the environment in and around buildings to provide better health comfort security and productivity and provides crucial expertise on monitoring the performance of buildings once they are occupied The authors explain the principles behind built environment engineering and offer practical guidance through international case studies

Building Governance and Climate Change Richard Lorch,Jacques Laubscher,Edwin Hon-wan Chan,Henk Visscher,2019-10-23 The contribution of buildings to climate change is widely acknowledged This book investigates how building regulatory systems are addressing the current and future effects of climate change and how these systems can be improved After presenting a comprehensive overview of how the current building regulatory system developed some of the inadequacies are identified The largest part of the book examines the potential for innovative policy solutions to address the real world problem of mitigating and adapting buildings to climate change This publication contributes significantly to our understanding of the complexities of long term energy efficiency in buildings This book was originally published as a special issue of the Building Research Information journal

Ethics for the Built Environment Peter Fewings,2008-09-16 Praise for Construction Project Management by Peter Fewings The complexity of the subject matter has at least been reinforced in an informative document with a large helping of common sense written in a comprehensive and well structured manner Building Engineer Magazine Ethics are not an optional extra for the professional in the built environment sector Whether you re a civil engineer an architect or a construction project manager an understanding of the ethical context of your work is an institutional requirement and a commercial demand not to mention a matter of personal pride Sometimes as a construction professional you will be faced with complicated dilemmas as commercial responsibilities clash with health and safety environmental or competition concerns Peter Fewings brings together practical construction project management experience with ethical theory to establish how best to deal with difficult issues

Towards a Cultural Politics of Climate Change Harriet Bulkeley,Matthew Paterson,Johannes Striiple,2016-09-15 This book develops new perspectives on the cultural politics of climate change and its implications for responding to this

challenge **House Rating Schemes** Maria Kordjamshidi,2010-11-25 House Rating Schemes provides information to students architects and researchers in the field of the built environment It reviews current House Rating Schemes HRS used in different countries and investigates how these schemes assess the thermal performance of a house It challenges the way that these schemes assess building energy efficiency and their inability to evaluate free running buildings which do not need an energy load for heating and cooling indoor environments Finally the book proposes a new index and method for HRS in which the efficiency of a house design can be evaluated with reference to its thermal performance in both free running and conditioned operation modes The book deals with various approaches and methods for rating buildings on the basis of different indexes with implications for both energy efficiency and thermal comfort It also guides readers through a computer simulation program for developing a rating system that evaluates and ranks building energy efficiency **Minimizing Energy Consumption, Energy Poverty and Global and Local Climate Change in the Built Environment: Innovating to Zero** Mattheos Santamouris,2018-10-15 Minimizing Energy Consumption Energy Poverty and Global and Local Climate Change in the Built Environment Innovating to Zero analyzes three major issues of the built environment including the political economic and technical contexts the impacts of global and local climate change and the technical and social characteristics of energy poverty In addition the book addresses the causes and reasons for the magnitude and characteristics of the built environment s energy consumption Users will find a fresh view of energy consumption in the built environment especially in relation to energy poverty and climate change from the ZERO energy world perspective Presents and analyzes over twenty specific linkages and causalities between energy consumption climate change and energy poverty Describes the state of the art regarding the energy consumption of buildings in Europe and recent trends and characteristics Explores how can we transform problems into opportunities Examines how we can increase the added value of technological economic and social interventions to generate wealth and offer employment opportunities **Energy 2050** Jim Skea,Paul Ekins,Mark Winskel,2012-06-25 Based on a major cross disciplinary project undertaken by some of the UK s top energy researchers with common scenarios to draw the research together this book views energy policy in the round with climate policy and energy security in a single framework Energy Research Abstracts ,1981-02 *Gender and Climate Change* Joane Nagel,2025-08-05 Does gender matter in global climate change This timely and provocative book takes readers on a guided tour of basic climate science then holds up a gender lens to find out what has been overlooked in popular discussion research and policy debates We see that around the world more women than men die in climate related natural disasters the history of science and war are intimately interwoven masculine occupations and preoccupations and conservative men and their interests drive the climate change denial machine We also see that climate policymakers who embrace big science approaches and solutions to climate change are predominantly male with an ideology of perpetual economic growth and an agenda that marginalizes the interests of women and developing economies The book uses vivid case studies to highlight the

often surprising gendered impacts of climate changes This new edition is a thorough update that includes revised and new chapters and new material that takes account of the significant advances in climate research environmental and social theory and the many political and social challenges posed in the wake of US elections Covid 19 pandemic and rapidly changing climate and environment The new edition also takes account of important social and cultural movements that resist challenges to women s rights and advocate for gender sexuality and racial justice This book will appeal to students researchers and academicians interested in environmental studies and gender studies It also will be of interest to policymakers activists and others involved with environmental policy and governance *Research Note FPL. ,2009*
