learning **Forward with Classics** Arlene Holmes-Henderson, Steven Hunt, Mai Musié, 2018-08-09 Despite their removal from England's National Curriculum in 1988 and claims of elitism Latin and Greek are increasingly re-entering the mainstream educational arena. Since 2012 there have been more students in state-maintained schools in England studying classical subjects than in independent schools and the number of schools offering Classics continues to rise in the state-maintained sector. The teaching and learning of Latin and Greek is not however confined to the classroom: community-based learning for adults and children is facilitated in newly established regional Classics hubs in evenings and at weekends in universities as part of outreach and even in parks and in prisons. This book investigates the motivations of teachers and learners behind the rise of Classics in the classroom and in communities and explores ways in which knowledge of classical languages is considered valuable for diverse learners in the 21st century. The role of classical languages within the English educational policy landscape is examined as new possibilities exist for introducing Latin and Greek into school curricula. The state of Classics education internationally is also investigated with case studies presenting the status quo in policy and practice from Australasia, North America, the rest of Europe and worldwide. The priorities for the future of Classics education in these diverse locations are compared and contrasted by the editors who conjecture what strategies are conducive to success.

The Oxford Handbook of Names and Naming Carole Hough, 2016-05-03 In this handbook scholars from around the world offer an up-to-date account of the state of the art in different areas of onomastics in a format that is both useful to specialists in related fields and accessible to the general reader. Since Ancient Greece names have been regarded as central to the study of language and this has continued to be a major theme of both philosophical and linguistic enquiry throughout the history of Western thought. The investigation of name origins is more recent as is the study of names in literature. Relatively new is the study of names in society which draws on techniques from sociolinguistics and has gradually been gathering momentum over the last few decades. The structure of this volume reflects the emergence of the main branches of name studies in roughly chronological order. The first Part focuses on name theory and outlines key issues about the role of names in language focusing on grammar, meaning and discourse. Parts II and III deal with the study of place names and personal names respectively while Part IV outlines contrasting approaches to the study of names in literature with case studies from different languages and time periods. Part V explores the field of socio-onomastics with chapters relating to the names of people, places and commercial products. Part VI then examines the interdisciplinary nature of name studies before the concluding Part presents a selection of animate and inanimate referents ranging from aircraft to animals and explains the naming strategies adopted for them.

Decolonisation in Universities Jonathan Jansen, 2019-08-01 In this collection of case studies and stories from the field South African scholars come together to trade stories on how to decolonise the university. Shortly after the giant bronze statue of Cecil John Rhodes came down at the University of Cape Town student protestors called for the decolonisation of universities. It was a word hardly heard in South Africa's struggle lexicon and many asked: What exactly is decolonisation? This edited volume brings together the best minds in curriculum theory to address this important question. In the process several critical questions are raised: Is decolonisation simply a slogan for addressing other pressing concerns on campuses and in society? What is the colonial legacy with respect to curriculum and can it be undone? How is the project of curriculum decolonisation similar to or different from the quest for postcolonial knowledge indigenous knowledge or a critical theory of knowledge? What does decolonisation mean in a digital age where relationships between knowledge and power are shifting? The book combines strong conceptual analyses with novel case studies of attempts to do decolonisation in settings as diverse as South Africa, Uganda, Tanzania and Mauritius. Such a comparative perspective enables reasonable judgements to be made about the prospects for institutional take up within the curriculum of century old universities.
