Public

Transportation in Kenya (A Phenomenological Study of Transport Issues) Joseph Kamau Muguro, Paul Waweru Njeri, Minoru Sasaki, 2024-08-16 Public Transportation in Kenya provides an in depth examination of the significant challenges faced by Kenya's public transportation system using a phenomenological approach to highlight the real world experiences of commuters and stakeholders. The book addresses two primary goals: to explain the severe impact of transportation issues on millions of Kenyans including loss of livelihoods, disabilities, and fatalities, and to propose solutions aimed at reducing road traffic accidents and improving overall transportation safety. The chapters begin with a review of Kenya's transport studies and current state, followed by an analysis of road traffic accident data and contributing factors. Subsequent sections explore the inadequacies in infrastructure, traffic law and enforcement, and the challenges posed by incomplete data collection. The book also details an innovative study using data mining and natural language processing (NLP) on over one million traffic-related tweets to uncover commuter trends and driver behaviors. The final set of chapters presents comprehensive recommendations for improving road safety, enhancing infrastructure, and reforming policing practices to better manage traffic and transportation issues. Key features of this book include the use of both structured and unstructured data for a robust analysis, practical solutions for policymakers, and an innovative methodological approach utilizing NLP and data mining to analyze the issues presented. References and summaries are also provided in each chapter to make information accessible. These elements make the book a valuable resource for researchers, academics, policymakers, transportation professionals, and anyone interested in the socio-economic impacts of public transportation in Kenya and other African countries. Public Transportation in Kenya is essential reading for those looking to understand and address the critical transportation challenges that affect millions daily, providing insights and solutions that can lead to safer and more efficient transport systems.

Engaging the Private Sector and Developing Partnerships to Advance Health and the Sustainable Development Goals National Academies of Sciences, Engineering, and Medicine, Health and Medicine Division, Board on Global Health, Forum on Public and Private Partnerships for Global Health and Safety, 2017-11-23 In September 2015, the Sustainable Development Goals (SDGs) were adopted at the United Nations Development Summit to serve as a 15-year plan of action for all countries and people. The SDGs include 17 specific goals and 169 associated targets that set out quantitative objectives across the social, economic, and environmental dimensions of sustainable development, all to be achieved by 2030. Health has been recognized as crucial for sustainable human development and an essential contributor to the economic growth of society. Beyond the goal to ensure healthy lives and promoting well-being for all at all ages, many of the other SDGs include targets that are essential to address the environmental and social determinants of health. Considering this context, the Forum on Public and Private Partnerships for Global Health and Safety convened a workshop series to examine potential opportunities to engage the private sector and develop partnerships to advance health and the SDGs. This publication summarizes the presentations and discussions from the workshop series.

Research on Nurturing Industrial Economy for Africa's Development Nafukho, Frederick Muya, Boniface Makulilo, Alexander, 2021-03-19 A robust manufacturing sector is a necessity and a sufficient condition for any country's human and economic development as it creates employment and alleviates poverty. During this Fourth Industrial Revolution era, there is an urgent need in Africa to optimally utilize the existing resources to support manufacturing or else risk allowing the continent to fall behind in the industrial economy. Innovative strategies are needed that can unlock Africa's manufacturing potential by exploring key areas that may help Africa mature and launch modernized economies that will benefit the developed world's industrial economy. The Handbook of Research on Nurturing Industrial Economy for Africa's Development examines various innovations necessary for Africa's economic development, including drivers of the manufacturing economy such as education, agriculture, human capital, science and technological innovations, language, politics, and business environments. The book explores strategies to increase Africa's economic diversity, complexity, productivity, and ultimately competitiveness and for the continent to realize its manufacturing industrial potential. Further chapters focus on African countries' industrial economies in the African context and facilitating the fulfillment of the Sustainable Development Goals (SDGs) and the African Union's Agenda 2063. This book is a valuable reference tool for government officials, economists, industrialists, practitioners, stakeholders, researchers, academicians, and students interested in the industrial economic development of Africa. No one could have predicted thirty years ago that online learning would become such a key facet of our educational landscape in nearly every corner of the world. Online teaching and learning have evolved rapidly and far more widely than imaginable, accompanied by huge impacts on business, society, and our entire educational enterprise. Drawing on his extensive experience in online teaching at both the graduate and undergraduate level, as well as his 25 years in higher education administration, the author paints a global picture of the evolution of online education. He describes how one country after another has witnessed the astonishing growth of online degrees and microcredentials of all kinds. Along the way, he dispels the myths and misperceptions that have grown up around

online learning With incisive analysis built on solid data the author demonstrates that online programs are no longer regarded as second class but in fact are fully in the mainstream of higher education Not only that but he predicts that by 2030 they will become the gold standard by which the more traditional degrees will be judged
