Technical Manual United States. War Department,1945 Reality Television and the Art of Trivialising Work Health, Safety and Wellbeing Trajce Cvetkovski,2024-07-30 This book aims to assess the extent to which work health safety and wellbeing HSW considerations are trivialised on the popular Australian reality TV programme The Block Reality TV as a genre plays a core feature in media and cultural studies but there has not been any research on the impact of reality TV on safety culture or how HSW issues are portrayed in popular media This research remedies this deficiency and demonstrates contestants are workers on The Block who perform workplace activities The work related activities are concerned with construction building and renovation work and specifically participants engage in what are seemingly routine or ordinary everyday life activities namely housing construction and domestic or home dwelling renovations It supports the argument claim that contestants on reality TV are defined as workers and this definition of worker can be extended to other genres The book ultimately demonstrates that reality television is trivialising HSW for the purposes of satisfying audience desire to consume popular culture and these activities perpetuate a poor image of best safety practice **Product Liability Case**

Goal Conflict in Juror Assessments of Compensatory and Punitive Damages Michelle Chernikoff Anderson,Robert J. MacCoun,1999 Recent tort reform debates have been hindered by a lack of knowledge of how jurors assess damages Two studies investigated whether jurors are able to appropriately compartmentalize compensatory and punitive damages In Study 1 mock jurors read a trial summary and were asked to assess compensatory and punitive damages in one of three conditions a compensatory damages only b punitive damages for the plaintiff or c punitive damages for the state treasury Results suggest that jurors who did not have the option to award punitive damages inflated compensatory damages via pain and suffering awards Jurors were marginally more likely to award punitive damages when the plaintiff was the recipient Mock jurors in Study 2 read a similar case summary and were asked to assess compensatory and punitive damages Two factors were varied in Study 2 a egregiousness of the defendant s conduct and b the recipient of any punitive damages the plaintiff vs a consortium of state funds Jurors were more likely to award punitive damages when the defendant s conduct was more egregious and when the plaintiff was the recipient The results suggest leakage between compensatory and punitive damage judgments contrary to the law s mandate
