Marine Simulation and Ship Manoeuvrability M.S. Chislett, 2021-10-01. Real time interactive ship simulators limped onto the scene in the wake of flight simulators some years ago. The maritime industries have a long history of conservatism, but this is now changing rapidly. The information age has also swept over ships and shipping and has been taken to heart to such an extent that, for example, flight simulators now cooperate with ship simulators and import useful new concepts and methodologies. The more than 50 papers contained in this book show what and why. Although traditionally conservative, the marine world is also traditionally international, and this has not changed. The papers in the book are by leading authors from all over the world and provide a detailed snapshot of the rapidly advancing state of the art, together with pointers to the future. The overall theme of MARSIM 96, and therefore also of this book, is Vessel manoeuvrability and marine simulation research, training, and assessment, and includes original papers on topics such as bridge resource management, distant learning, and simulators coupled via The Internet, virtual reality, neural networks, rudder, propeller hydrodynamics, prime mover models, squat in shallow water, and many more.

Naval Science Wilbur A. Sundt, 1978.

Developing the Naval Mind Benjamin F. Armstrong, 2021-11-15. Throughout the history of the U.S. Navy and Marine Corps, leading officers and strategists have advocated for formal colleges and schools for naval officers, but have also made the case that true naval professionalism requires a career-long dedication to learning and to self-improvement. This was the impetus behind the very founding of the U.S. Naval Institute by officers who believed that the Navy's lack of support for their education meant they needed to create their own organization for self-study and cooperative learning. Naval luminaries like admirals William Sims and Ernest King continued to campaign for self-study and the personal pursuit of professional knowledge during the twentieth century, distributing lists of suggested books for officers to read and promoting their ideas widely through speeches and published works. While recommending that officers read broadly in pursuit of individual knowledge is an important part of creating a truly educated and professional Fleet and Fleet Marine Force, it is also important for leaders in the sea services to offer mentorship and create opportunities for discourse that encourages group learning. *Developing the Naval Mind* serves as a how-to manual and syllabus for leaders to create and lead wardroom, ready room, and work center discussion groups across the fleet to create a more educated and professionally engaged Navy and Marine Corps.
