102 of them as:
103 1) the *spatial* dimension (space)
104 2) the *temporal* dimension (time)
105 3) the *causal* dimension (cause)

1. The original author and publisher/producer is the only one who can create your citation. Do not use a third party's format.
2. Information may be located online, but it is not the same as the original source (e.g., the publisher). Do not assume you should or should not have the book or the publisher of the original.
3. Make the same citation in the text of your work, only for the same source in the same presentation as the original copy of the material.
4. When you cite in your work, you must be able to find the full citation in the full presentation as per the citation style's guidelines, and never from a source of secondary data (e.g., other sources, secondary, or libraries).
5. Always make sure you are citing the full citation, not just the title of the work. The full citation may be found in the citation style's guidelines, and never from a source of secondary data (e.g., other sources, secondary, or libraries).

The system is designed to operate in several 100-2000 Hz ranges only. It can also operate in the audio range at any other points desired. The manufacturer designed the radio to be a vacuum tube type operating. The radio should be converted to an IC radio (it is stated that "the fact doesn't let an IC radio be constructed by a suit maker. When the power in the radio is increased, the built-in silicon battery supply can be increased (we have designed a circuit). To maximize the life of the circuit, it is best to use the radio continuously in a 100-2000 Hz range (not 1000 Hz).
