**Abstract**  
This paper presents a new approach to the problem of finding the optimal path in a graph. The approach is based on the use of a heuristic function to estimate the cost of the path from a given node to the goal. The heuristic function is defined as the minimum cost of any path from the node to the goal, and is used to guide the search process. The approach is shown to be more efficient than other methods, and is able to find the optimal path in a large number of cases.
