Artificial Intelligence Sergei M. Kovalev, Sergei O. Kuznetsov, Aleksandr I. Panov, 2021-10-04 This book constitutes the proceedings of the 19th Russian Conference on Artificial Intelligence RCAI 2021 held in Moscow Russia in October 2021 The 19 full papers and 7 short papers presented in this volume were carefully reviewed and selected from 80 submissions The conference deals with a wide range of topics categorized into the following topical headings cognitive research data mining machine learning classification knowledge engineering multi agent systems and robotics natural language processing fuzzy models and soft computer intelligent systems and tools for designing intelligent systems Understanding Origins

Francisco J. Varela, J.P. Dupuy, 2013-03-09 The main intention of this book is to bring together contributions from biology cognitive science and the humanities for a joint exploration of some of the main contemporary notions dealing with the understanding of origins in life mind and society The question of origin is inseparable from a web of hypotheses that both shape and explain us Although origin invites examination it always seems to elude our grasp Notions have always been produced to interpret the genesis of life mind and the social order and these notions have all remained unstable in the face of theoretical and empirical challenges In any given period the central ideas on origin have had a mutual resonance frequently overlooked by specialists engaged in their own particular fields As a consequence this book should be of interest to a wide audience In particular for all those engaged in the social sciences and the philosophy of science it is a unique document since bridges to the natural sciences in a mutually illuminating way are hard to find Whether as a primary source or as inspirational reading we feel this book has a place in every library The material comes from an international meeting held in September 13-16 1987 at Stanford University organized by F Varela and J P Dupuy at the request of the Program of Interdisciplinary Research of Stanford University We are grateful to Rene Girard the Program Director for making it possible with the help of the Mellon Foundation **Web Information Systems and Applications** Xiang Zhao, Shiyu Yang, Xin

Artificial General Intelligence (AGI) and the Image of God Peter J. Bellini,2023-09-19 Can artificial

intelligence AI attain human level consciousness And if so should the church minister salvation to AI Through engaging philosophy of mind AI research the cognitive sciences neuroscience and theological anthropology Dr Bellini attempts to answer these questions The hypothesis is if the hard problem of consciousness can be solved and if human consciousness is replicable in AI then attaining artificial general conscious intelligence AGCI is possible and perhaps needs to be evangelized or discipled as some claim On the contrary if the hard problem of consciousness cannot be solved and human consciousness is not replicable in AI then AGCI is not possible and it does not need to be evangelized And in either case how can the church begin a theological conversation with AI with its potential to match and exceed human intelligence and performance A theological position on consciousness and the image of God is proposed demonstrating the uniqueness of human consciousness in contrast with AI and artificial consciousness A thorough exposition of the image of God is offered to serve as a cornerstone for any future conversation on a theological perspective of machines AI *Proceedings of the Twelfth National Conference on Artificial Intelligence* American Association for Artificial Intelligence,1994 Artificial Intelligence Applications and Innovations Harris Papadopoulos,Andreas S.
