heartwarming to hear the comments from contributors So many research scientists field biologists and veterinarians could easily have given up and said I just can't do this now especially with the added challenges posed by the current COVID 19 pandemic Instead contributors from around the world were determined to contribute to this collection because of their inspiration and shared commitment with Greg's vision The love and admiration within the marine community for Greg is phenomenal With that said we would be remiss if we did not say a few words about Greg as a mentor and friend Greg had a knack for helping students realize their abilities and pursue their own independent contributions to the marine mammal community He shared in their successes and worked tirelessly to facilitate their aspirations Greg would involve students early career scientists and colleagues in projects introduce them to collaborators and promote them and their work Greg was a genuinely caring person When he asked you how are you doing he honestly wanted to know He was always there ready to listen and provide guidance If you were to ask Greg what was most important to him in life he would say God family and marine life and one could argue that he had a special fondness for manatees He believed in the beauty of nature and that God had a hand in all of it He was in pursuit of ensuring that we all share this earth responsibly and sustainably We miss Greg dearly but honor and celebrate him as we carry on in our pursuits *Commerce Business Daily*, 2001-07 GC / MS

Marvin C. McMaster, 2011-09-20 Updated and expanded the classic guide to GC MS helps chromatographers quickly learn to use this technique for analyzing and identifying compounds After explaining the fundamentals it discusses optimizing tuning using and maintaining GC MS equipment explores advances in miniaturized and field portable GC MS systems and microfluidic components and more Complete with a CD ROM it covers applications in the environmental laboratory and in forensics toxicology and space science This is the premier resource for professionals in those fields and for students

Practical Introduction to GC-MS Analysis with Quadrupoles Michael Oehme, 1999-08-24 The basics of modern compact GC MS systems have barely changed during the last 20 years Ion sources still become contaminated and have to be cleaned Leaks occur and as ever the gas chromatograph is the most frequent source of troubles A new and more worrisome trend however is that the manuals are becoming shorter and shorter Unfortunately also the knowledge of the service staff seems to decrease Experts with years of experience are increasingly difficult to find This book aims to compensate this by giving answers to questions such as How does my mass spectrometer work What types of fault can show up and how do I detect them How must separation and detection be adapted to each other Which pitfalls can be avoided when elucidating structures and quantifying compounds This book is intended to help newcomers from making their first steps into this rather complex technique to the development of highly demanding methods for trace analysis Advanced users also will find much practical advice which will
