Models and Methods Applicable to Corps of Engineers Urban Studies Waterways Experiment Station (U.S.),1974
The report is basically a source book for individuals who are actually concerned with the problem of constructing alternative plans for developing urban areas It reviews the methods and computer models that are currently available to the planner or engineer for developing water and related land resources These reviews discuss the availability and usefulness of several models give a brief technical description of each model including the input data required and indicate the amount and type of computer hardware needed to use each model The report is directed mainly toward water related problems Thus most of the methods discussed deal with urban drainage wastewater management flood routing reservoir operation water supply flood zoning and the social and economic aspects associated with these areas Modified author abstract The Computer Engineering Handbook Vojin G. Oklobdzija,2001-12-26 There is arguably no field in greater need of a comprehensive handbook than computer engineering The unparalleled rate of technological advancement the explosion of computer applications and the now in progress migration to a wireless world have made it difficult for engineers to keep up with all the developments in specialties outside their own NASA Thesaurus ,1982 *Publications of the National Institute of Standards and Technology 1988 Catalog* Rebecca J. Kaisler,2020-10-22 This volume describes General Electric Corporation s venture into developing second and third generation mainframe computer systems The General Electric Corporation GE which began its life as the Edison Electric Co was long involved in electrical appliances and industrial machines It was also a founder of the Radio Corporation of America which eventually became one of its competitors and developed many electrical systems in order to control different types of industrial machines Its breakthrough into computing came with its winning bid to provide the computing systems for the Electronic Recording Method of Accounting system developed for the Bank of America by the Stanford Research Institute The success of this project led GE to develop the GE 200 series which was the foundation for commercial timesharing The GE 235 was selected by Dartmouth for its Dartmouth Time Sharing System DTSS an innovative academic time sharing system BASIC was developed on the GE 235 computer system under DTSS GE enhanced it to develop its Mark II III Time Sharing System apparently the first commercial time sharing service in the world GE develop the GE 300 400 systems for industrial process control The GE 600 series replaced the GE 200 series and demonstrated innovation in time sharing systems The GE 645 was selected to host Multics which was developed by MIT However GE felt that it could not compete in computing against IBM Univac and other mainframes competitors so it folded its tent and sold its Computer Division to Honeywell Inc Nevertheless

GE will be remembered for many innovations which continue to be used in modern computing systems *Signal* ,1986
