Dominant Divisions of Labor: Models of Production That Have Transformed the World of Work T. Janoski,D. Lepadatu,2013-11-27 The past century of labor was definitively captured by theories like Fordism and Taylorism or scientific managment but how do we make sense of global production today This short book takes a panoramic view of the candidates for the most succinct theory of the 21st century division of labor including post Fordism flexible accumulation McDonaldization Waltonism Nikeification Gatesism and Siliconism shareholder value and lean production and Toyotism Authors Thomas Janoski and Darina Lepadatu argue that lean production in a somewhat expanded version presents three variations Toyotism the strongest form Nikeification a moderate form with off shored plants lacking teamwork and Waltonism the merchandising form that presses for off shoring While all three share strong elements of just in time JIT production and supply chain management they differ in how teamwork and long term philosophies are valued This critical review of dominant established theories serves to inform subsequent research on the contemporary international division of labor
