Technical guidance on fall armyworm Food and Agriculture Organization of the United Nations,2022-05-27 Worldwide maize is the third most important cereal after rice and wheat It occupies 197 million hectares of planted area Asia contributes to nearly 30 percent of global maize supplies and area and production of the crop is rapidly increasing in the continent Minimum support prices swelling market demand from the animal feed and processing industries as well as human

consumption have all led to increased maize production in zones where precipitation limits rice cultivation. However, maize production is currently threatened by the arrival in Asia in 2018 of the fall armyworm FAW *Spodoptera frugiperda* J. E. Smith, a native to North America. It invaded India in 2018 and since then it has marched to most of the Asian countries. In 2019 its presence was confirmed in 13 Asian countries including Cambodia, China, India, Indonesia, Japan, the Lao People's Democratic Republic, Malaysia, Myanmar, Nepal, the Philippines, the Republic of Korea, Sri Lanka, and Viet Nam. In 2020 it was confirmed in Australia, Timor-Leste, and Papua New Guinea. In August 2021 it reached the Solomon Islands, posing a serious threat to other Pacific islands. FAW is a fast-dispersing migratory transboundary insect pest. While high FAW incidences have been reported on several crops in Asia, the most important economic damage caused is to maize, followed by sorghum. The FAW invasion threatens the food security of millions of family farms in Asia, with smallholder farmers being especially vulnerable. The negative economic impact of FAW is not only evident in yield loss; the pest also leads to a significant increase in insecticide applications, with associated health, environmental, and cost issues. At the same time, resilience to FAW on the continent is currently weakened by the limited access to necessary tools, technologies, and sustainable integrated pest management (IPM) practices for FAW. Thus, there is an urgent need to implement an effective approach to FAW management in Asia.

Herbicides Ruben Alvarez-Fernandez, 2012-01-20. Weeds severely affect crop quality and yield. Therefore, successful farming relies on their control by coordinated management approaches. Among these chemical herbicides are of key importance. Their development and commercialization began in the 1940s, and they allowed for a qualitative increase in crop yield and quality when it was most needed. This book blends review chapters with scientific studies, creating an overview of some of the current trends in the field of herbicides. Included are environmental

studies on their toxicity and impact on natural populations methods to reduce herbicide inputs and therefore overall non target toxicity and the use of bioherbicides as natural alternatives

Ethical Tensions from New Technology Harvey S James Jr, 2018-08-20 The introduction of new technologies can be controversial especially when they create ethical tensions as well as winners and losers among stakeholders and interest groups While ethical tensions resulting from the genetic modification of crops and plants and their supportive gene technologies have been apparent for decades persistent challenges remain This book explores the contemporary nature type extent and implications of ethical tensions resulting from agricultural biotechnology specifically and technology generally There are four main arenas of ethical tensions public opinion policy and regulation technology as solutions to problems and older versus new technologies Contributions focus on one or more of these arenas by identifying the ethical tensions technology creates and articulating emerging fault lines and where possible viable solutions Key features include focusing on contemporary challenges created by new and emerging technologies especially agricultural biotechnology Identifying a unique perspective by considering the problem of ethical tensions created or enhanced by new technologies Providing an interdisciplinary perspective by including perspectives from sociologists economists philosophers and other social scientists This book will be of interest to academics in agricultural economics sociology and philosophy and policymakers concerned with introducing new technology into agriculture

The Top Books of the Year Gmos 04 Manual The year 2023 has witnessed a remarkable surge in literary brilliance, with numerous compelling novels captivating the hearts of readers worldwide. Lets delve into the realm of bestselling books, exploring the fascinating narratives that have enthralled audiences this year. Gmos 04 Manual : Colleen Hoover "It Ends with Us" This heartfelt tale of love, loss, and resilience has captivated readers with its raw and emotional exploration of domestic abuse. Hoover masterfully weaves a story of hope and healing, reminding us that even in the darkest of times, the human spirit can succeed. Uncover the Best : Taylor Jenkins Reids "The Seven Husbands of Evelyn Hugo" This spellbinding historical fiction novel unravels the life of Evelyn Hugo, a Hollywood icon who defies expectations and societal norms to pursue her dreams. Reids compelling storytelling and compelling characters transport readers to a bygone era, immersing them in a world of glamour, ambition, and self-discovery. Gmos 04 Manual : Delia Owens "Where the Crawdads Sing" This evocative coming-of-age story follows Kya Clark, a young woman who grows up alone in the marshes of North Carolina. Owens weaves a tale of resilience, survival, and the transformative power of nature, captivating readers with its evocative prose and mesmerizing setting. These top-selling novels represent just a fraction of the literary treasures that have emerged in 2023. Whether you seek tales of romance, adventure, or personal growth, the world of literature offers an abundance of compelling stories waiting to be discovered. The novel begins with Richard Papen, a bright but troubled young man, arriving at Hampden College. Richard is immediately drawn to the group of students who call themselves the Classics Club. The club is led by Henry Winter, a brilliant and charismatic young man. Henry is obsessed with Greek mythology and philosophy, and he quickly draws Richard into his world. The other members of the Classics Club are equally as fascinating. Bunny Corcoran is a wealthy and spoiled young man who is always looking for a good time. Charles Tavis is a quiet and reserved young man who is deeply in love with Henry. Camilla Macaulay is a beautiful and intelligent young woman who is drawn to the power and danger of the Classics Club. The students are all deeply in love with Morrow, and they are willing to do anything to please him. Morrow is a complex and mysterious figure, and he seems to be manipulating the students for his own purposes. As the students become more involved with Morrow, they begin to commit increasingly dangerous acts. The Secret History is a brilliant and suspenseful novel that will keep you wondering until the very end. The novel is a warning tale about the dangers of obsession and the power of evil.
