Trauma-Responsive Schooling Lyn Mikel Brown, Catharine Biddle, Mark Tappan, 2022-08-23
 Trauma Responsive Schooling outlines a novel approach to transforming American schools through student centered trauma informed practices The book chronicles the use of an innovative educational model Trauma Responsive Equitable Education TREE as part of a multiyear research project in two elementary schools in rural Maine In this model Lyn Mikel Brown Catharine Biddle and Mark Tappan endorse whole school change encouraging educators to upend traditional classroom power dynamics by listening foremost to student voices validating student experiences and promoting student agency The authors provide complex real life examples of student involvement in the creation and implementation of trauma responsive and equitable practices Their work offers readers concrete actionable examples of such practices which include supporting the whole child by promoting social and emotional learning SEL as well as academic achievement providing access to basic needs such as

food clothing and health care and meeting the instructional requirements of dual language learners Many rural schools in the United States experience low student achievement and high absenteeism rates as their geographically isolated communities struggle with poverty substance abuse and other significant stressors Yet as the authors demonstrate supportive learning environments even in under resourced rural schools are able to mitigate adversity stress and trauma and thus promote healing This heartening work illustrates that when educators and school leaders put student needs and interests at the core of school life long lasting change for all students is possible

Getting to the Common Core Sharon L. Spencer, Sandra Vavra, 2015-01-01 The Common Core Standards have recently been adopted in most states across the nation and teachers are in the process of getting to the core of these standards Teaching to standards is not a new concept teachers have adapted to new standards every few years for quite some time And teachers are adaptable as can be seen in this book We are writing this book to demonstrate how teachers use research based strategies to meet Common Core Standards while still focusing on students Our goal is to help teachers visualize students in action as other teachers describe the implementation of research based strategies in their own classrooms show student work samples and provide reflections of student success in achieving the standards Many Common Core Standards books focus on the standards but our approach focuses on strategies that engage the students in the classroom showing how different teachers at varying grade levels have used the strategies to meet the standards With this focus we believe that teachers gain a new and positive perspective on approaching the new standards and see the flexibility of strategies for meeting standards across subject areas We have examined research on the strategies with the purpose of giving teachers a brief description of why these strategies work before giving actual examples from classrooms We also work closely with teachers in the public schools and have our finger on the pulse of what is happening in the public schools one of the current stressors being unpacking the Common Core Standards This book actually focuses on practice We begin by laying out a rationale in our first chapter The Core Values of Education Then each chapter focuses on a strategy including 1 a brief description about the research supporting each strategy and 2 several examples from different grade levels which include a description of how the strategy was used student work samples and a reflection on the use of the strategy The research descriptions are fairly short because while we believe professional educators aka teachers in this case should know the research that supports practice we know they are not typically interested in long diatribes about the research
