River Flow 2016 George Constantinescu,Marcelo Garcia,Dan Hanes,2016-06-22 Understanding and being able to predict fluvial processes is one of the biggest challenges for hydraulics and environmental engineers hydrologists and other scientists interested in preserving and restoring the diverse functions of rivers The interactions among flow turbulence vegetation macroinvertebrates and other organisms as well as the transport and retention of particulate matter have important consequences on the ecological health of rivers Managing rivers in an ecologically friendly way is a major component of sustainable engineering design maintenance and restoration of ecological habitats To address these challenges a major focus of River Flow 2016 was to highlight the latest advances in experimental computational and theoretical approaches that can be used to deepen our understanding and capacity to predict flow and the associated fluid driven ecological processes anthropogenic influences sediment transport and morphodynamic processes River Flow 2016 was organized under the auspices of the Committee for Fluvial Hydraulics of the International Association for Hydro Environment Engineering and Research IAHR Since its first edition in 2002 the River Flow conference series has become the main international event focusing on river hydrodynamics sediment transport river engineering and restoration Some of the highlights of the 8th International Conference on Fluvial Hydraulics were to focus on inter disciplinary research involving among others ecological and biological aspects relevant to river flows and processes and to emphasize broader themes dealing with river sustainability River Flow 2016 contains the contributions presented during the regular sessions covering the main conference themes and the special sessions focusing on specific hot topics of river flow research and will be of interest to academics interested in hydraulics hydrology and environmental engineering

Mobile Technologies in Libraries Ben Rawlins,2016-09-08 The ever expanding usage of mobile technologies has dramatically changed how we access

information and how we as a society expect to access information With mobile technologies becoming available to an increasing majority of the population users are constantly connected to information The rapid expansion of mobile technology has had a profound impact on many different sectors industries and institutions among those that have been affected are libraries With more users expecting access to information and resources in a mobile optimized format libraries have had to adapt to meet the needs of users This has entailed evaluating various library services and resources to determine how to best meet the needs of mobile users Additionally mobile technology has changed the way that websites are designed and has led to an increasing popular type of web design know as responsive web design RWD This enables web developers to design websites with one code base that are optimized for a wide range of devices from desktop computers to smartphones Libraries must keep their mobile services current or risk becoming obsolete Based on research examples and experience using mobile technology this book will include topics such as The impact of mobile technology Mobile technology and the Digital Divide Implications for library staff and vendors Responsive Web Design Wearable technology in library services Mobile Technologies in Libraries A LITA Guide is written for library staff interested in how mobile technologies have changed the way we access and expect to access information as well as how libraries can incorporate and adapt to mobile technology

Feminist Research for 21st-century Childhoods B. Denise Hodgins, 2019-03-21 This book is a collection of feminist childhood studies stories from field research with educators young children and or early childhood student educators that explores the challenges tensions and possibilities of common worlds research methods for the 21st century Grounded in a common worlding orientation the contributing authors grapple with complex methodological understandings within postqualitative practices within settler colonial states Australia Canada South Africa and the United States Each chapter presents a method the authors have put to work in their efforts to unsettle the interpretative power of Euro Western developmental knowledges and anthropocentric frameworks to reimagine research amid the colonialist social and environmental challenges we face today The researching stories act as provocations for generating innovative relational and emergent methods to attend to the complexity of 21st century childhoods Just as developmental and sociological perspectives gave birth to new forms of inquiry within childhood studies in 19th century industrialization and 20th century urban change respectively the 21st century requires novel questions practices and methodologies to enhance the childhood studies lexicon In the field of childhood studies where settler colonial and neoliberal logics have so much clout such strategies are crucial Feminist Research for 21st century Childhoods is an important and relevant read for anyone working and researching with children

Remote Sensing for Archaeology and Cultural Landscapes Diofantos G. Hadjimitsis, Kyriacos Themistocleous, Branka Cuca, Athos Agapiou, Vasiliki Lysandrou, Rosa Lasaponara, Nicola Masini, Gunter Schreier, 2019-06-07 This book investigates the added value that satellite technologies and remote sensing could provide for a more sustainable mapping monitoring and management of heritage sites be it for purposes of regular maintenance or for risk mitigation in

case of natural or man caused hazards One of the major goals of this book is to provide a clear overview on policy perspectives regarding both space policy as well as heritage policy and to provide possible suggestions for common ground of these two fields in Europe and around the world Readers will develop a good understanding of cutting edge applications of remote sensing and geographic information science and the challenges that affect heritage maintenance and protection Particular attention is given to Earth observation and remote sensing techniques applied in different locations This book brings together innovative technologies concrete applications and policy perspectives that can lead to a more complete vision of cultural heritage as a resource for future development of our society as a whole **The Gadget Show** ,2014-03-20

Design Change to Fishery Independent Surveys: When to Adjust and How to Account For It Fabio Campanella, Ben Scoulding, Nathan Bacheler, Kyle Shertzer, 2025-03-07 Fishery independent surveys provide crucial information for monitoring and assessing marine fish stocks Their utility can largely be attributed to sampling procedures that are consistent across space and time such that observed dynamics can reasonably be assumed to reflect those of the population or community being studied However sometimes changes to the survey design become desirable or necessary They may be desirable if the benefits of modification outweigh the benefits of consistency for example with improvements in sampling technology or efficiency revised survey priorities or increased funding that allows for greater spatial coverage or temporal resolution In other cases changes to the survey design may not be desirable but necessary for example when specific supplies or equipment become unobtainable or with reductions in funding ship time or human resources

Unmanned Aerial Remote Sensing David R. Green, 2020-07-10 Unmanned Aircraft Systems UAS are a rapidly evolving technology with an expanding array of diverse applications In response to the continuing evolution of this technology this book discusses unmanned aerial vehicles UAVs and similar systems platforms and sensors as well as exploring some of their environmental applications It explains how they can be used for mapping monitoring and modeling a wide variety of different environmental aspects and at the same time addresses some of the current constraints placed on realizing the potential use of the technology such as flight duration and distance safety and the invasion of privacy etc Features of the book Provides

necessary theoretical foundations for pertinent subject matter areas Introduces the role and value of UAVs for geographical data acquisition and the ways to acquire and process the data Provides a synthesis of ongoing research and a focus on the use of technology for small scale image and spatial data acquisition in an environmental context Written by experts of the technology who bring together UAS tools and resources for the environmental specialist Unmanned Aerial Remote Sensing UAS for Environmental Applications is an excellent resource for any practitioner utilizing remote sensing and other geospatial technologies for environmental applications such as conservation research and planning Students and academics in information science environment and natural resources geosciences and geography will likewise find this comprehensive book a useful and informative resource
