Stephen Trudgill, 2022-02-24 How we view nature transforms the world around us People rehearse stories about nature which make sense to them If we ask the question why conserve nature and the answers are based on myths then are these good myths to have Scientific knowledge about the environment is fundamental to ideas about how nature works It is essential to the conservation endeavour However any conservation motivation is nested within a society's meanings of nature and the way society values it Given the therapeutic and psychological significance of nature for us and our culture this book considers the meanings derived from the poetic and emotional attachment to a sense of place which is arguably just as important as scientific evidence The functional significance of species is important but so too is the therapeutic value of nature together with the historic and spiritual meanings entwined in a human feeling for landscape and wildlife **Handbook of Research on Integrating Digital Technology With Literacy Pedagogies** Sullivan, Pamela M., Lantz, Jessica L., Sullivan, Brian A., 2019-11-22 The allure and marketplace power of digital technologies continues to hold sway over the field of education with billions spent annually on technology in the United States alone Literacy instruction at all levels is influenced by these evolving and ever changing tools While this opens the door to innovations in literacy curricula it also adds a pedagogical responsibility to operate within a well developed conceptual framework to ensure instruction is complemented or augmented by technology and does not become secondary to it The Handbook of Research on Integrating Digital Technology With Literacy Pedagogies is a comprehensive research publication that considers the integration of digital technologies in all levels of literacy instruction and prepares the reader for inevitable technological advancements and changes Covering a wide range of topics such as augmented reality literacy and online games this book is essential for educators administrators IT specialists curriculum developers instructional designers teaching professionals academicians researchers education stakeholders and students **Changing Times at the Rocky Mountain Forest and Range Experiment Station** R.
