**Social Theory for English for Academic Purposes** Alex Ding,Michelle Evans,2022-07-28 This book written by pioneering architects of original social theory in educational linguistic fields as well as expert practitioners systematically exposes the sociological commitments of mainstream ideas and theories in English for Academic Purposes EAP commitments which are very often not fully examined by the discipline but nonetheless shape practitioners ideas and their praxis The initial chapters outline what social theory is the normative critical descriptive social and generative purposes it serves the scope and limits of social theory and tracing the major historical traditions and recent currents This mapping of social theory is followed by a detailed argument that makes the case for the centrality of social theory for EAP practitioners and praxis and the need to develop a sociological imagination to enhance knowledge and agency of practitioners The contributions reveal the sociological foundations and commitments that underpin established theories in EAP such as genre theories systemic functional linguistics and academic literacies Each of these three

major research streams in EAP is subject to critical analysis linking each of these streams to the sociological commitments that underpin them Finally the book explores the social theories and approaches that have yet to make a full or significant impact on EAP research and practice but would enable practitioners and researchers to understand educational contexts texts structures culture s knowledge production and producers and social agents with greater sociological clarity and sophistication Topics covered include social realism legitimation code theory critical realism ethnography feminism and Bourdieusian concepts for EAP The overarching aim of this volume is to position social theory much more centrally to frameworks and conceptions of the unstable and contested knowledge base for EAP practitioners and to promote a sociological imagination among and for EAP practitioners

**Exploring Functional-Cognitive Space** Christopher S. Butler, Francisco González-García, 2014-08-28 This book intended primarily for researchers and advanced students expands greatly on previous work by the authors exploring the topography of the multidimensional functional cognitive space within which functional cognitive and or constructionist approaches to language can be located The analysis covers a broad range of 16 such approaches with some additional references to Chomskyan minimalism and is based on 58 questionnaire items each rated by 29 experts on particular models for their importance in the model concerned These ratings are analysed statistically to reveal overall patterns of dis similarity across models The questionnaire ratings and experts comments are then used together with the authors close reading of the literature in detailed discussion leading to a final dichotomous rating for each feature in each model the results again being analysed statistically The final chapter presents the overall conclusions and suggests how existing collaborations between approaches could be strengthened and new ones created in future research Exploring Functional Cognitive Space has been awarded the 2016 prize of the Spanish Association for Applied Linguistics Asociaci n Espa ola de Ling stica Aplicada AESLA for work by experienced researchers

*Contrastive Register Variation* Stella Neumann, 2013-12-12 The book provides the first comparison of usage preferences across registers in the language pair English German Due to the innovative quantitative approach and broad coverage the volume is an excellent resource for scholars working in contrastive linguistics and translation studies as well as for corpus linguists

**Cross-Linguistic Corpora for the Study of Translations** Silvia Hansen-Schirra, Stella Neumann, Erich Steiner, 2012-12-06 The book specifies a corpus architecture including annotation and querying techniques and its implementation The corpus architecture is developed for empirical studies of translations and beyond those for the study of texts which are inter lingually comparable particularly texts of similar registers The compiled corpus CroCo is a resource for research and is with some copyright restrictions accessible to other research projects Most of the research was undertaken as part of a DFG Project into linguistic properties of translations Fundamentally this research project was a corpus based investigation into the language pair English German The long term goal is a contribution to the study of translation as a contact variety and beyond this to language comparison and language contact more generally with the language pair English German as our object languages

This goal implies a thorough interest in possible specific properties of translations and beyond this in an empirical translation theory. The methodology developed is not restricted to the traditional exclusively system based comparison of earlier days where real text excerpts or constructed examples are used as mere illustrations of assumptions and claims but instead implements an empirical research strategy involving structured data, the sub corpora and their relationships to each other annotated and aligned on various theoretically motivated levels of representation, the formation of hypotheses and their operationalizations, statistics on the data, critical examinations of their significance and interpretation against the background of system based comparisons and other independent sources of explanation for the phenomena observed. Further applications of the resource developed in computational linguistics are outlined and evaluated.

The Language of Sex Education Georgia Carr, 2025-01-09 This book offers a deep dive into sex education pedagogy in the Australian context taking a close look at the language used to teach the key topics of consent and respect. It examines questions students ask, how teachers accommodate different beliefs in their classrooms and how students learn about more values based topics including consent, respectful relationships and gender and sexuality diversity. It also considers what teaching and assessment looks like over the course of a school term and what makes a successful student. In short it answers the question how is sex education actually taught. The Language of Sex Education provides the first book length treatment of the language of sex education offering a detailed account of pedagogy from the perspective of Systemic Functional Linguistics. The study is situated in the Australian context though has broader relevance to places such as New Zealand, North America and the United Kingdom whose sex education is historically and culturally comparable to that of Australia. The book provides descriptions of the key topics of consent and respect illustrating how teachers impart technical knowledge and how they support students to adopt and challenge the nuanced values needed when engaging with sex education. It does this through new descriptions of key linguistic resources of technicality and iconization that synthesize the central knowledge and values of the field. Through these descriptions and analyses this book not only provides a detailed account of sex education pedagogy but also offers new insights into the role of language in building fields and building communities.
