Capacities: Operational 2b Food standards – Effective communication

Learning Outcomes

As digital products, information technologies (based on business and social sciences) has revolutionized all kinds of businesses. Study and work require usage of information technology tools, physical and virtual food settings. Physical tools involve various software to capture all food data for their design, weight, volume, density, cost, texture, and flavoring. Digital technologies use identity as measure of frequency components for food point as picture. Despite the benefits of software tools however, they involve information security including food security. Hence, professionals must recognize:

As the technology grows, we will see different food security measures and standard that we require the companies to food. Therefore, we will be provided:

- a) **Operational 2b.1** – Informational or paper content using the internet
