Fieldwork W. Fife, 2005-09-16. Making use of his own research experiences in Papua New Guinea, Southern Ontario, and Newfoundland, Wayne Fife teaches students and new researchers how to prepare for research, conduct a study, analyze the material, e.g., create new social and cultural theory, and write academic or policy-oriented books, articles, or reports. The reader is taught how to combine historic and contemporary documents, e.g., archives, newspapers, government reports, with fieldwork methods, e.g., participant observation, interviews, and self-reporting, to create ethnographic studies of disadvantaged populations. Anthropologists, Sociologists, Folklorists, and Educational researchers will equally benefit from this critical approach to research. *Winning at Math* Paul D. Nolting, 2002. Every student must pass math courses to graduate. Doing well in math can both increase your career choices and allow you to graduate. *Winning at Math* will help you improve your math grades quickly and easily. The format of *Winning at Math* has been revised to make it easier to read, and it contains much more proven math study skills techniques. The chapter on test anxiety has been expanded to assist students with math anxiety, not just test anxiety. From publisher's description. **Teachers' Professional Development and the Elementary**

Mathematics Classroom Sophia Cohen, 2004-07-13. This book illustrates the experiences of elementary school teachers across one year's time as they participated in a teacher development seminar focused on mathematics and, as a result, changed their beliefs, their knowledge, and their practices. It explores these experiences as a means of understanding the learning that takes a teacher from a more traditional teaching practice to one that is focused on the ideas and understandings that students and teachers have of the subject matter. The work emerges from and reports on a unique data set from a two-year study of teacher learning that was funded by the Spencer and MacArthur foundations. The teachers whose work is at the center of this study were participants in the Developing Mathematical Ideas seminar (DMI), a mathematics teacher development seminar for elementary school teachers. This seminar is one example of intensive domain-specific professional development. In this seminar, teachers study elementary mathematics content to deepen their own

understanding of it they study the development among children of the ideas central to elementary mathematics and they experience a teaching and learning environment consistent with the pedagogy envisioned by the National Council for Teachers of Mathematics Principles and Standards for School Mathematics The seminar is a nationally available teacher development curriculum thus interested educators can gain access to the resources necessary to offer similar seminars in their own communities Teachers Professional Development and the Elementary Mathematics Classroom Bringing Understandings to Light will be widely interesting to a broad audience including mathematics teacher educators teacher education researchers policymakers and classroom teachers It will serve well as a text in a range of graduate courses dealing with teacher cognition knowledge for teaching mathematics methods psychology of learning and pedagogical theory Five Strands of Math - Tasks Big Book Gr. 3-5 Nat Reed, Mary Rosenberg, Chris Forest, Tanya Cook, 2009-12-01 Extend your learners basic knowledge of the Five Strands of Math with our 5 book BUNDLE Our resource provides task and word problems surrounding real life scenarios Start with an in depth look at fractions and percentages with Number Operations Cut a cake into equal parts to share with friends Then solve for x in Algebraic equations Explore expressions by substituting values with numbers Move on to polygons and triangles in Geometry Extend your knowledge of symmetry by looking at rotational symmetry Go from estimating to converting Measurements with imperial and metric values Get acquainted with angles by using a protractor Finally convert Data gathered in a chart to Probability statistics The task sheets provide a leveled approach to learning starting with grade 3 and increasing in difficulty to grade 5 Aligned to your State Standards and meeting the concepts addressed by the NCTM standards reproducible task sheets drill sheets review and answer key are included **Prohibition on Federally Sponsored National Testing** United States.
