Measuring Up Arie L. Nettles,Michael T. Nettles,2012-12-06 Measuring Up revisits vital issues of equity and assessment through the research efforts and insights of many of the nation s most prominent educators and assessment experts As its most urgent purpose the publication aims to sensitize readers to the unfairness and inappropriate uses of testing instruments which under optimal circumstances have the potential to benefit all students With America fervently espousing both national and state testing the differential performance by race and social class raises the specter of tests as barriers to life milestones such as promotion graduation and college admissions In response to such punitive testing the papers included here explore a host of models and practices that are currently being piloted both in America and abroad as educators grapple with the effects the assessment is having on minority and disadvantaged students and school systems In the process outcomes of innovative portfolio and authentic assessments are weighed against important standards and principles of validity and consequences As the various authors probe the gap between African American and White test scores they raise important questions of resources family background and educational opportunity Beyond their value of their recommendations to educators their papers help to identify causes of pupil deficiencies in ways that can be addressed by policymakers To reinforce the emphasis on equity several authors present a definitive defense of affirmative action as a critical counter measure to the lack of fairness in school quality family and social supports and educational resources

Debating the Future of American Education Diane Ravitch,2010-12-01 What is the outlook for educational reform in the United States One of the most striking proposals has been to establish a system of national standards which has raised many complex questions Is it possible for the United States with its history of extreme decentralization to establish and enforce national standards for what students should know Who will create these standards What would be the role of the federal state and local governments While the idea of national standards has been widely supported many respected educators doubt their value from fear that such standards will institutionalize the lowest common denominator Others cite the poor performance of U S students on international tests and insist that the U S will suffer because of this poor performance The debate becomes even more intense when the question of assessment is posed Is it possible to develop a national examination system tied to new standards Should such tests be used to influence entry to

colleges and jobs Would the motivation of students to learn be increased if they knew that their performance would be reviewed by colleges and employers Is it fair to set standards for students without setting standards for schools To address these and other questions this book the result of a Brookings conference brings together representatives of various viewpoints on the utility and equity of increasing the use of tests for students teachers and schools The contributors are Chester Finn Jr the Edison Project Daniel Koretz RAND Andrew Porter Wisconsin Center for Education Research Lauren Resnick University of Pittsburgh Roy Romer Governor of Colorado Albert Shanker American Federation of Teachers Theodore R Sizer Brown University Marshall C Smith U S Department of Education and Donald M Stewart The College Board Brookings Dialogues on Public Policy **Harcourt Science: Physical science, [grade] 4, Units E and F, teacher's ed.
