Information Management, Michael B. Ballew, p. 41
 The author of this paper reports on a project to develop a system for managing information. The system is designed to help managers make better decisions by providing them with the information they need in a timely and accessible manner. The system is based on a database of information and a set of rules that determine how the information is presented to the user. The system is currently being used by a number of managers and has been found to be effective in helping them make better decisions.
