nothing that whets the appetite quite like the suctioning sound of a refrigerator being opened In the early 1930s fewer than
ten percent of US households had a mechanical refrigerator but today they are nearly universal the primary means by which
we keep our food and drink fresh Yet for as ubiquitous as refrigerators are most of us take them for granted letting them
blend into the background of our kitchens basements garages and all the other places where they seem so perfectly
convenient In this book Helen Peavitt amplifies the hum of the refrigerator in technological history showing us just how it
became such an essential appliance Peavitt takes us to the early closets cabinets and boxes into which we first started
packing ice and the various things we were trying to keep cool From there she charts the development of mechanical and
chemical technologies that have led to modern day refrigeration on both industrial and domestic scales showing how these
technologies have created a completely new method of preserving and transporting perishable goods having a profound
impact on society from the nineteenth century and on She explores the ways the marketing of refrigerators have expressed
and influenced our notions of domestic life and she looks at how refrigeration has altered the agriculture and food industries
as well as our own appetites Strikingly illustrated this book offers an informative and entertaining history of an object that
has radically changed in a little over one hundred years one of the most important things we do eat The New Yorker

Development Tim Jones,1997 New Product Development presents a unique cross discipline approach to new product
development and goes further than most product design books by drawing together the various strands that make up total
design now the accepted way to develop new products The successful development of new products has become a complex
process involving contributions from a range of different disciplines Rarely is one individual responsible for the inception
creation and realisation of a new product for today the inherent complexity of products markets and the processes through
which they are developed dictates that a number of functions each with their own roles work together to create the product
This book presents a cross discipline discussion of new product development its organisation its management the key stages
and key functions involved Through the use of six major case studies and numerous mini cases the author demonstrates how
a number of manufacturing companies have successfully illustrated separate elements into the new product development
