

High performance photo, film and document scanning have reached new levels with the EPSON PERFECTION 3170 PHOTO. Through a unique combination of EPSON's advanced technologies and applications, this scanner delivers amazing results – with incredible ease.

High Image Quality and High Resolution

Professional users demand high image quality and high resolution. The PERFECTION 3170 PHOTO combines advanced technologies to consistently deliver stunning results. It features an advanced 5800dpi main scanning ability, which is achieved by utilizing a MicroCCD Charge Coupled Device and a new Micro Lens. The user and precision positioning of these devices combine to deliver superb light sensitivity that is critical to high performance scanning, without the need for a large voltage. Also included is a dedicated RGB Application Specific Integrated Circuit for optimized image processing, adding further to the groundbreaking scanning performance of the PERFECTION 3170 PHOTO. And the entire package is driven at 1800dpi using EPSON's Micro Step Drive sub-scanning technology.

Automatic Document Feeder (Optional Extra)

A high performance solution, the PERFECTION 3170 PHOTO also features Automatic Document Feeder (ADF), which supports automatic document scanning of documents up to legal size, with an added capacity of up to 30 sheets and document scanning speed of 4.3spm. The PERFECTION 3170 PHOTO represents an entirely new level of desktop scanning professionalism.

Professional Film Scanning

Professional photography demands and requires requiring high performance film scanning can rely on the professional film scanning capabilities of the PERFECTION 3170 PHOTO. Its integrated Transparency Unit (TFU), features new powerful sensor for faster scanning speeds. To make film and negative scanning even easier, the PERFECTION 3170 PHOTO includes three film holders, which support:

- 35mm rolls film x 10 frames
- 35mm x 6 slides mounted film
- Medium format (135x225) up to 6 x 6 film x 1 frame strip film

When used in conjunction with the EPSON Scan Software/Driver, each film frame can automatically be saved as a separate image file. The TFU also provides storage for two separate film holders.

EPSON Scan

With the introduction of the newly developed EPSON Scan Software/Driver, users of the EPSON PERFECTION 3170 PHOTO benefit from a high performance, flexible driver that functions also as a stand alone application. By featuring three separate user modes – Full Auto mode, Photo mode and Professional mode – EPSON Scan can be dynamically changed to reflect the scanning tool requirements of all users, from novice to professional. Some of the new features in the professional mode are Multi-magnify, Histogram, Multiple Level Limbry Mode and Multi-level Documenting. As a single software tool solution, EPSON Scan can automatically save scanned images to file in a variety of standard formats.

Photo Restoration

Adding to the new EPSON Scan tools are Color Restoration and Color Removal. Designed specifically for high quality photo and film scanning, Color Restoration employs sophisticated technology to substantially restore image color that has been subjected to fading and other color film influences, such as light and exposure contaminants. With the Color Removal feature, EPSON Scan automatically detects dust on film or negatives, and then makes the necessary adjustments.

EPSON Smart Panel

As a result of its newly designed interface, the EPSON Smart Panel software represents a perfect balance between power and ease-of-use. Scanning is fast, it's easy. Our multi-page PDF, text, HTML and even scanning business cards is little more than a mouse click away.

Business Card Scanning

New to the Smart Panel family of apps is the newly created Business Card A.I.D. Combining OCR, databases and integration technology, this versatile software allows you to scan business cards which are automatically converted and stored in an easy-to-search database. You can now synchronize with, and export to industry standard database applications.

PRINT Image Matching II Technology

Incorporated into the EPSON Smart Panel software is PRINT Image Matching II (PIM II). With PIM II, you can select from 11 different photo-scene types with which to optimize your image. Simply select the scene type that you are scanning and PIM II will apply the best image adjustments to give you the best quality image possible.
