Kosik, M.D.,Ellen Clegg,2010-04-27 The solution research neurologist Kosik and medical journalist Clegg propose reads like the opening round in what they clearly hope will become a national dialogue about optimizing treatment for people with dementia including Alzheimer s disease Cogent thorough and convincing BooklistAs the Baby Boomer generation moves into the ranks of the elderly in the next decade or two the number of Alzheimer cases expected to develop will be staggering Since current medical care cannot offer a cure and even significantly effective treatment is at least ten years away there is a pressing need for novel solutions to address the multifaceted issues raised by this devastating disease This book offers a measure of hope and coping strategies for people facing Alzheimer s now or in the future Authors Kenneth S Kosik MD a

neurologist and a leading Alzheimer's researcher and experienced healthcare journalist Ellen Clegg propose the creation of community centers devoted to Alzheimer's. Here patients and their families could access programs of care, treatment and most importantly prevention outside of the traditional medical setting. They outline a bold vision of one-stop centers that would provide expertise and reliable information on a range of topics: pharmaceutical developments, dietary regimens, physical and cognitive exercise programs that may help to slow the disease process and palliative measures to reduce suffering. Most important, the centers they describe would take a family-oriented, personalized approach to care and prevention, creating an atmosphere conducive to adult learning and facilitating personal growth in areas that patients have enjoyed over a lifetime, including the arts, dance, socializing and a host of other possibilities. The authors explain why the current healthcare system is poorly equipped to deal with Alzheimer's patients, why the standard medical model is inappropriate for cognitive disorders, how market economics stymies physician creativity and how new initiatives that work outside the existing system could go a long way toward providing the help that is lacking today. For people prepared to take action now to prevent Alzheimer's as well as healthcare professionals seeking ways to help their patients, this book is a must read.
