a compendium of 30 Formative Assessment Probes columns from NSTA's elementary journal *Science and Children*. Each chapter provides a sample formative assessment probe, a set of interesting questions that root out commonly held often mistaken ideas. Geared to elementary students, probe topics range from why you can see the Moon in the daytime to where water goes when it evaporates to what is or isn't a rock. Your students' answers to each probe will help you take a step back and figure out how to guide them from where they are conceptually to where they need to be. Accompanying teacher notes are easy to grasp explanations and advice that tell you how to encourage evidence-based discussion and then monitor students' understanding. A bonus feature is a set of study group questions written especially for this compendium by award-winning author Page Keeley. So forget about acquiring psychic powers. Instead, turn to *What Are They Thinking?* to transform both your teaching and your students' learning about science.

**Handbook of Reading Research** Michael L. Kamil, 2000. In Volume III, as in Volumes I and II, the classic topics of reading are included, from vocabulary and comprehension to reading instruction in the classroom. In addition, each contributor was asked to include a brief history that chronicles the legacies within each of the volume's many topics. However, on the whole, Volume III is not about tradition. Rather, it explores the verges of reading research between the time Volume II was published in 1991 and the research conducted after this date. The editors identified two broad themes as representing the myriad of verges that have emerged since Volumes I and II were published: 1) broadening the definition of reading and 2) broadening the reading research program. The particulars of these new themes and topics are addressed.

**CompTIA RFID+ Study Guide** Patrick J. Sweeney, II, 2006-12-26. This comprehensive study guide thoroughly covers the CompTIA RFID exam, the only certification offered for radio frequency identification (RFID), the technology that is rapidly gaining popularity and is expected to completely replace bar codes. Your study will focus on interrogation zone basics, testing and troubleshooting standards and regulations, tag knowledge, design, selection, installation, site analysis, RF physics, and RFID peripherals. The accompanying CD-ROM provides two bonus exams, a detailed glossary of terms, and a searchable PDF of the book.
